convergence of various technologies including communications broadcasting information technology and home electronics and emerging new communication services and applications resulting from the growth of the Internet and wireless technologies Please go to [www.ee.uta.edu/dip](http://www.ee.uta.edu/dip) for additional information *Communications Middleware for Tactical Environments: Observations, Experiences, and Lessons Learned*, 2009 Tactical networking environments present significant challenges that must be overcome in order to effectively support net centric warfare The wireless and ad hoc nature of these networks implies unreliable connectivity limited bandwidth and variable latency Past and current research has focused on physical and data link layers routing protocols transport protocols and cross layer aspects However significant work is needed at the upper layers to better support application requirements In our experience achieving effective communications in tactical environments requires taking into account application requirements and communication patterns designing a rich interface between the application and communication layers and realizing a communications middleware specifically adapted to tactical networks In this article we report on our observations from several tactical networking experiments and demonstrations and the lessons learned from deployment of the Mockets middleware to support tactical communications We hope these experiences are useful to others designing and implementing applications and systems for tactical environments

**Middleware for Network Eccentric and Mobile Applications** Benoît Garbinato, Hugo Miranda, Luís Rodrigues, 2009-02-07 Middleware is a critical foundation needed to leverage the development of a wide range of mobile and ubiquitous applications Intrinsic challenges when building such middleware require the combination of expertise from areas like distributed systems networking software engineering and application development This textbook provides a comprehensive introduction to the main fundamental problems technologies paradigms and solutions of concern to developers of middleware for mobile environments The contributions are grouped into four parts on networking and programming issues communication models middleware issues and application issues Each chapter is structured as a self contained tutorial presenting an overview of a specific topic and the state of the art solutions for the related problems In addition the book also includes an authoritative reference list The material has been successfully used in several thematic training schools organized by the ESF MiNEMA Middleware for Network Eccentric and Mobile Applications program and the book's organization and presentation is ideal for an advanced course on middleware *Controller and Communications Middleware Survey and Evaluation*, 1998 There is a need for a standard core architecture to reduce the costs of developing and maintaining ground control systems for different satellites This report documents a survey and evaluation of next generation computing technology trends relevant to the need In addition to the advent of the Internet there are two Important on going evolutions impacting the area the migration to distributed client server computing and the paradigm shift to object oriented OO programming New application software is being developed based on a distributed object model and clients are tied to servers by software called middleware Available commercial off the shelf COTS controller and

communication middleware are evaluated for their applicability to satellite ground stations and for distributed processing distributed database access and distributed systems management Available products and vendors are listed Low cost satellite ground station application software with the flexibility to adapt as requirements change can be built using COTS available middleware Although most middleware frees the application developer from the need for network programming it nevertheless requires an experienced implementation staff for the selection of an integrated set of middleware products
