**Nutraceuticals for Aging and Anti-Aging** Jayant Nemchand Lokhande, Yashwant Vishnupant Pathak, 2021-11-25 Aging can be perceived differently during different times in one's life. Aging as a process not only influences medical and economic dimensions at an individual level but also at societal and national levels. Aging is a natural process; however, its standard definition in a healthcare context is yet unclear. To delay the aging process and to maintain quality of life until the end of life are two goals of prime importance. Various healthcare approaches are being developed and experimented on to best manage aging as if it is a disease. Nutraceuticals are value-added dietary supplement products and have an immense potential in altering key structures and functions of aging. Nutraceuticals can be a keystone in altering sub-normal performing physiological and metabolic systems due to aging. Nutraceuticals for Aging and Anti-Aging: Basic Understanding and Clinical Evidence addresses aging and anti-aging nutraceuticals based on 10 major challenges such as cognitive health, malnutrition, substance abuse, bladder control, and oral health among others. It examines how these challenges can be complemented with nutraceuticals and connects the applications with the traditional wisdom of the aging process. Key Features: Examines the aging process then recommends nutraceuticals for aging and anti-aging processes. Describes the aging process from the western perspective and Ayurvedic medicine, Indian traditional system, and traditional Chinese medicine perspectives. Provides whenever possible the clinical evidence of the applications of nutraceuticals for aging and anti-aging. This book is a valuable resource for physicians, clinical experts, pharmaceutical companies and their experts, nutrition specialists, entrepreneurs, chemists, pharmacists, food chemists, technologists, as well as researchers and postgraduate students involved in these specialties. Also available in the Nutraceuticals Basic Research Clinical Applications Series: Bioactive Peptides, Production, Bioavailability, Health Potential, and Regulatory Issues, edited by John O. Onuh, M. Handbook of Nutraceuticals for Clinical Use Arrigo F.G. Cicero, Alessandro Colletti, 2018-02-21 This handbook provides key information on the clinical use of nutraceuticals an increasingly common practice grounded in an understanding of the pharmacological activities of natural compounds and clinical evidence of efficacy and safety Each chapter examines the effects of nutraceuticals in different therapeutic contexts including nutraceuticals active on the digestive system heart lipid and glucose metabolism and immune system The authors also address relevant concerns such as relative and absolute contraindications range of tested doses efficacious and safe possible side effects and pharmacological interactions and the scientific level of clinical evidence for each product Despite the availability of a large number of nutraceuticals on the market the same compound is often offered by different industries at different dosages and concentrations with different titration and often with different suggestions of efficacy Available academic books on nutraceuticals prioritize summarizing information or focus on the pharmacological aspects on cells or animals models rather than on proof in humans The handbook takes a unique and practical approach intended to assist clinicians pharmacologists nutritionists and dietitians considering prescribing nutraceuticals for therapeutic use Renowned expert Professor Arrigo Cicero is known internationally for his work in nutraceuticals and currently serves as President of the Italian Nutraceutical Society

*Functional Foods I.* Goldberg, 2012-12-06 Accuse not Nature She has done her part Do Thou but Thine Milton Paradise Lost 1667 The concept that nature imparted to foods a health giving and curative function is not new Herbal teas and remedies have been used for centuries and continue in use in many parts of the world today In modern society we have turned to drugs to treat mitigate or prevent diseases However since the discovery of nutrients and our increasing analytical capabilities at the molecular level we are beginning to become more knowledgeable of the biochemical structure function relationship of the myriad of

chemicals that occur naturally in foods and their effect on the human body The holistic approach to medicine and diet that began in the 1970s has now seen a renewal as we realize that certain foods because of the presence of specific biochemicals can have a positive impact on an individual's health physical well being and mental state In fact because of the negative image of drugs and the grey area of supplements the use of foods that are functional is becoming a growth area for the food industry In Japan this concept has led to one of the largest growing markets where they have defined functional foods as regular foods derived only from naturally occurring ingredients The Japanese further require that the functional foods be consumed as part of the diet and not in supplement form i e

Handbook of Nutraceuticals and Functional Foods ROBERT E C WILDMAN, PhD, 2016-04-19 Scientific advances in this field have not only given us a better understanding of what is an optimal diet but has allowed food and nutraceutical companies to market products with specific health claims fortify existing foods and even create new foods designed for a particular health benefit Handbook of Nutraceuticals and Functional Foods Second Edition compiles the latest data from authoritative scientific sources It provides hard evidence on the prophylactic and medicinal properties of many natural foods This handbook reviews more than 200 nutraceutical compounds Each chapter includes the chemical properties biochemical activity dietary sources and evidentiary findings for each compound New topics include the use of exopolysaccharides from lactic acid bacteria protein as a functional ingredient for weight loss and nutraceuticals to be used in the adjunctive treatment of depression Two new chapters discuss recent evidence on oxidative stress and the antioxidant requirements of athletes as well as the use of nutraceuticals for inflammation The scientific investigation of nutrition and lifestyle changes on the pain and debilitation of osteoarthritis is the subject of another new article The book concludes with a look at future marketing opportunities paying particular attention to the alleviation of obesity With contributions from a panel of leading international experts Handbook of Nutraceuticals and Functional Foods Second Edition provides instant access to comprehensive cutting edge data making it possible for food scientists nutritionists and researchers to utilize this ever growing wealth of information

Functional Foods and Nutraceuticals Rotimi E. Aluko, 2012-06-05 Functional food or medicinal food is any fresh or processed food claimed to have a health promoting and or disease preventing property beyond the basic nutritional function of supplying nutrients although there is no consensus on an exact definition of the term This is an emerging field in food science in which such foods are usually accompanied by health claims for marketing purposes such as a company's cereal is a significant source of fiber Studies have shown that an increased amount of fiber in one's diet can decrease the risk of certain types of cancer in individuals Functional foods are sometimes called nutraceuticals a portmanteau of nutrition and pharmaceutical and can include food that has been genetically modified The general category includes processed food made from functional food ingredients or fortified with health promoting additives like vitamin enriched products and also fresh foods e g vegetables that have specific claims attached Fermented foods with live cultures are often also considered to be functional foods with
