Janice Thompson
Melodye Mamone

"Whenever I see this book, the words *new* and *current* come to mind. The illustrations, colors, text font, and the tables add to an excellent reading/learning experience for the learner."

— Priya Venkatesan, Pasadena City College

"I use the animations for all of the chapters; they help me to explain the various systems. The clicker questions keep the students involved in the lecture and generate conversation."

— Virginia Bennett, Central Washington University

"The graphics and PowerPoint® presentation are great, and are well-prepared."

— Bassam Salameh, California State University, Bakersfield

"I loved the airy text, the vivid pictures, the "get to the point" approach, and I was pleased with the grouping of the vitamins and minerals by function rather than a regurgitated listing."

— Carol Friesen, Ball State University

"The text is adaptable for a diverse group of students. It is a stand-alone resource for the Internet students. There are excellent Web sites for referral that I use in the Discussion Board areas of the course. The

"I like the Test Yourself questions at the start of each chapter; they represent some common misconceptions that I see in my students. These questions revolve around nutritional topics that are my favorite topics to teach, yet hardest to get across."

— Chris Wendtland, Monroe Community College

"It provides an applied approach that helps students understand and apply knowledge learned to real-life situations."

— Janet Tora, West Virginia University

"We adopted this text because of the way the authors present the material. It does a great job at laying out the issue and supporting points. I also really like the Highlights, Recaps, and Key Terms."

— Jennifer Weddig, Metropolitan State College of Denver

"I adopted Nutrition: An Applied Approach because it covers the topics in a more sensible way, and in a more interesting way, than any other textbook I had used. It just makes more sense."

— Francis Alphin, Duke University Medical Center

"A lot of the nutrition textbooks are very similar. I really enjoy the layout and writing of this one. It is very easy to read and understand. I think it is great for college students and I think the features make it stand out from others."

— Candice Possinger, SUNY Buffalo

"I use the Nutri-Classes in every chapter and I have found that generates questions students don't think to ask. I have students thinking of ways to apply the information."

— Jennifer Weddig, Metropolitan State College of Denver
