Object Oriented Programming In Common Lisp A Programmers Guide To Clos:

Object-oriented Programming in COMMON LISP Sonya E. Keene,1988 *Object-oriented Programming in Common LISP* Sonya E. Keene,Dan Gerson,1989 This book is an introduction to the CLOS model of object oriented programming CLOS the Common Lisp Object System is a newly designed object oriented programming language that has evolved as a standard from various object oriented extensions of the basic Lisp language The language definition of CLOS comprises a set of tools for developing object oriented programs in Common Lisp The book serves two purposes it is a practical guide to CLOS programming and stands as a tutorial teaching object oriented techniques for software design and development

Interfaces to Database Systems (IDS94) Peter H. Sawyer,2013-11-11 A brief survey of the major DBMS and Hel conference proceedings over the past 10 years will reveal isolated pockets of research in database user interfaces but little sense of being swept along with the general advances in DBMS technology and Hel New data models have evolved to meet the needs of different application domains persistent programming languages are blurring the traditional distinction between data definition and application programming languages distribution and inter operability have become issues as have the storage of heterogeneous media types yet it is still rare to read of the Hel issues raised by these technological innovations being expressly addressed and rarer still to find recognition of the usability problems with longer established database technologies There are at least two reasons why this should be surprising Database systems are not like other computer systems existing both as back ends to other applications and as stand alone data stores they are typically slow deal with very large volumes of data and can involve all sorts of security confidentiality and even cooperability issues Databases are everywhere Perhaps only word processors and spread sheets are more widespread In addition as business cultures change and personal computing continues to mould expectations end users find themselves interacting increasingly closely with database systems *User Interface Management and Design* David A. Duce,M. Rui Gomes,F. Robert A. Hopgood,John R. Lee,2012-12-06 This volume is a record of the Workshop on User Interface Management Systems and Environments held at INESC Lisbon Portugal between 4 and 6 June 1990 The main impetus for the workshop came from the Graphics and Interaction in ESPRIT Technical Interest Group of the European Community ESPRIT Programme The Graphics and Interaction in ESPRIT Technical Interest Group arose from a meeting of researchers held in Brussels in May 1988 which identified a number of technical areas of common interest across a significant number of ESPRIT I and ESPRIT II projects It was recognized that there was a need to share information on such activities between projects to disseminate results from the projects to the world at large and for projects to be aware of related activities elsewhere in the world The need for a Technical Interest Group was confirmed at a meeting held during ESPRIT Technical Week in November 1989 attended by over 50 representatives from ESPRIT projects and the Commission of the European Communities Information exchange sessions were organized during the EUROGRAPHICS 89 conference with the intention of disseminating information from

ESPRIT projects to the wider research and development community both in Europe and beyond

Advanced Database Systems Peter M.D. Gray, 1992-06-24 The theme of this book is the potential of new advanced database systems The volume presents the proceedings of the 10th British National Conference on Databases held in Aberdeen Scotland in July 1992 The volume contains two invited papers one on the promise of distributed computing and the challenges of legacy systems by M L Brodie and the other on object oriented requirements capture and analysis and the Orca project by D J L Gradwell The following four parts each contain three submitted papers selected from a total of 36 submissions The parts are entitled Object oriented databases Parallel implementations and industrial systems Non relational data models Logic programming and databases
