Some authors make a clear distinction between information systems computer systems and business processes Information systems typically include an ICT component but are not purely concerned with ICT focusing instead on the end use of information technology Information systems are also different from business processes Information systems help to control the performance of business processes Alter argues for advantages of viewing an information system as a special type of work system A work system is a system in which humans and or machines perform work processes and activities using resources to produce specific products and or services for customers An information system is a work system whose activities are devoted to processing capturing transmitting storing retrieving manipulating and displaying information As such information systems inter relate with data systems on the one hand and activity systems on the other An information system is a form of communication system in which data represent and are processed as a form of social memory An information system can also be considered a semi formal language which supports human decision making and action Information systems are the primary focus of study for organizational informatics *Object-Oriented Information Systems* Dimitri Konstantas,Michel Leonard,Yves Pigneur,Shusma Patel,2003-09-09 The conference on Object Oriented Information Systems OOIS is now an es blished international conference where innovative ideas research applications and experiences in the design development and use of object oriented infor tionsystems fromboththeacademicandindustrialenvironments arepresented The ninth OOIS conference was held at the University of Geneva September 2 5 2003 The main theme was the Evolution of Object Oriented Information Systems The papers presented ideas and issues related to the evolution ad tability restructuring and exibility of OOIS In the context of the conference ve workshops and four tutorials were organized providing a discussion forum for new ideas and including in depth presentations on important hot subjects The three invited speakers of the ninth OOIS conference provided an ternative view on OOIS and their evolution Prof John Mylopoulos Univ sity of Toronto and VLDB president gave the opening presentation entitled Agent Oriented IS Development Dr Richard Soley OMG President and CEO gave the closing presentation entitled Model Driven Architecture The Evolution of Object Oriented Systems and Prof Lina Al Jadir American U versity of Beirut gave the theme presentation entitled Once Upon a Time a DTD Evolved into Another DTD Object-oriented Systems Analysis and Design Ronald J. information systems architecture and Corba and roles and evolvable objects   <u>OOIS'98</u> Colette Rolland,Georges Grosz,2012-12-06 The Sorbonne University is very proud to host this year the oms Conference on Object Oriented Information Systems There is a growing awareness of the importance of object oriented techniques methods and tools to support information systems engineering The term information systems implies that the computer based systems are designed to provide adequate and timely information to human users in organizations The term engineering implies the application of a rigorous set of problem solving approaches analogous to those found in traditional engineering disciplines The intent of this conference is to present a selected number of those approaches which favor an object oriented view of systems engineering oms 98 is the fifth edition of a series of conferences Starting in 1994 in London this series evolved from a British audience to a truly European one The goal is to build a world wide acknowledged forum dedicated to object oriented information systems engineering This conference is organized with the aim to bring together researchers and practitioners in Information Systems Databases and Software Engineering who have interests in object oriented information systems The objective is to advance understanding about how the object technology can empower information systems in organizations on techniques for designing effective and efficient information systems and methods and development tools for information systems engineering The conference aims also at discussing the lessons learned from large scale projects using objects The call for oms was given international audience   **Advances in Object-oriented Information Systems** OOIS 2002 Workshops on Advances in Object-Oriented Information Systems,2002   **Systems for Sustainability** Frank A. Stowell,Ray L. Ison,Rosalind Armson,Jacky Holloway,Sue Jackson,Steve McRobb,2013-11-11 The term sustainability has entered the lexicon of many academic disciplines and fields of professional practice but to date does not appear to have been seriously consid ered within the systems community unless perhaps under other guises Within the wider community there is no consensus around what sustainability means with some authors identifying 70 to 100 definitions of the term Some see sustainability as the precise and quantifiable outcomes of biological systems whilst others see it in terms of processes rele vant to personal and organizational change with the potential to effect changes in our rela tionships with out environments Internationally it has been increasingly used in relation to the term sustainable development a term popularised by the Brundland Commis of definitions sion s report in 1987 entitled Our Common Future Despite this diversity and polarised perception on its utility unlike many other popular terms it has not had its time and subsided quietly from our language It is therefore timely for the systems com munity to explore the relationship between systems and sustainability in a range of con texts Participants in this the 5th International Conference of the United Kingdom Systems Society UKSS have been invited to reflect critically on the contribution of sys tems thinking and action to sustainability to the sustainability of personal relationships the organizations in which live and work and our natural environment
