Notes \_\_\_\_\_ Date \_\_\_\_\_  
Who is the hero? Answer the questions.

**The Emperor's New Suit by Hans Christian Andersen**  
One day the皇帝 comes to the city. Many middle people  
believe that they were rich and powerful. They could  
manufacture the finest clothes for the emperor. These clothes had  
patterns, feathers and were very expensive. The emperor  
had given them all their money. He wanted the  
quality of being invisible for one man who was sent for the  
clothes. He was very curious. "What could be wonderful clothes?" thought  
the emperor. "If I wear the clothes in a big crowd of the  
city, it should be visible to them and make me very angry.  
But with the new clothes, could I be seen?  
And how delicious. That  
was."

*Handbook of Individual Differences in Reading* Peter Afflerbach, 2015-08-11 The central unifying theme of this state of the art contribution to research on literacy is its rethinking and reconceptualization of individual differences in reading. Previous research focused on cognitive components of reading signaled the need for ongoing work to identify relevant individual differences in reading to determine the relationship of individual differences to reading development and to account for interactions among individual differences. Addressing developments in each of these areas this volume also describes affective individual differences and the environments in which individual differences in reading may emerge, operate, interact and change. The scant comprehensive accounting of individual differences in reading is reflected in the nature of reading instruction programs today, the outcomes that are expected from successful teaching and learning and the manner in which reading development is assessed. An important contribution of this volume is to provide *prima facie* evidence of the benefits of broad conceptualization of the ways in which readers differ. The *Handbook of Individual Differences in Reading* moves the field forward by encompassing cognitive, non-cognitive, contextual and methodological concerns. Its breadth of coverage serves as both a useful summary of the current state of knowledge and a guide for future work in this area.
