Software Engineering, Artificial Intelligence, Networking and Parallel/Distributed Computing Roger Lee, 2022-11-18 This book presents scientific results of the 23rd ACIS International Summer Virtual Conference on Software Engineering, Artificial Intelligence, Networking and Parallel Distributed Computing (SNPD2022 Summer) which was held on July 4-6, 2022 at Kyoto City, Japan. The aim of this conference was to bring together researchers and scientists, businessmen and entrepreneurs, teachers, engineers, computer users and students to discuss the numerous fields of computer science and to share their experiences and exchange new ideas and information in a meaningful way. Research results about all aspects, theory, applications and tools of computer and information science and to discuss the practical challenges encountered along the way and the solutions adopted to solve them. The conference organizers selected the best papers from those papers accepted for presentation at the workshop. The papers were chosen based on review scores submitted by members of the program committee and underwent further rigorous rounds of review. From this second round of review, 15 of the most promising papers are then published in this Springer SCI book and not the conference proceedings. We impatiently await the important contributions that we know these authors will bring to the field of computer and information science.

Startup Finance 2.0 Sam Ghosh, 2025-08-29 Traditional corporate financial theories and tools are based on matured companies with the assumption that the companies are going concerns. Going Concern refers to the assumption that a

company will continue to operate indefinitely with no intention or necessity of liquidation or cessation of operations in the foreseeable future. The problem is that the Going Concern assumption does not hold for startups due to the inherent uncertainty associated with startups. Traditional financial education and resources usually meant for analysts and accountants aren't ideal for entrepreneurs. They focus on analyzing past data from established businesses not on making forward looking decisions in the uncertain and highly dynamic environment of startups. Entrepreneurs also often struggle to prioritize the allocation of resources between seemingly urgent matters and matters that are important for the long term value of the startup. Thus this book takes a value oriented approach to startup finance. The book is designed to build the financial intuition that an entrepreneur needs to prioritize matters vital for the long term value of the company, raise capital and allocate capital for value maximization. It also looks at finance from a value creation point of view and covers specific methods especially suited for startups from investment assessment to valuation to fundraising to managing day to day finances.
