**Virtual Events Management** Tim Brown, Claire Drakeley, 2023-08-30 The COVID-19 pandemic and resulting lockdowns has seen a boom in the occurrence of virtual events. Virtual Events Management is a unique text as it looks at events from both a live event, virtual event, and hybrid perspective.

Public Discourse and the Fashion Industry Natalia Berger, 2026-02-24 This book explores what happens when fashion discourse migrates from specialised media to mainstream newspapers. Analysis of 2263 texts across five Dutch and international case studies: animal welfare, disability, repair practices, smart wearables, and metaverse fashion demonstrates systematic reversal instead of creating desire; it provokes aversion instead of fostering inclusion; it reinforces marginalisation instead of encouraging creativity; it stokes speculative investment appetites. Drawing on Barthes's semiology of fashion, Foucault's discourse theory, and Lotman's concept of the semiosphere, the book introduces critical discursive matrix analysis as a method for examining fashion at its periphery. The findings reveal that when fashion intersects with social issues in mainstream media, it becomes colonised by other discursive systems: medical, civic, technology, and financial, while fashion industry voices retreat, replaced by NGOs, activists, and technology companies pursuing non-fashion agendas. The volume provides insights into why sustainability efforts fail despite awareness, how media representation shapes consumer behaviour, and why fashion discourse cannot evolve within its commercial framework. Public Discourse and the Fashion Industry will engage a diverse audience including fashion studies scholars, discourse analysts, media researchers, sustainability practitioners, policymakers, fashion industry strategists, and communication specialists.
