Field & Stream ,1971-10 FIELD STREAM America's largest outdoor sports magazine celebrates the outdoor experience with great stories compelling photography and sound advice while honoring the traditions hunters and fishermen have passed down for generations    **Now Media** Norman J. Medoff,Barbara K. Kaye,2025-05-06 Now in its fifth edition this book is one of the leading texts on the evolution of electronic mass communication in the last century giving students a clear understanding of how the media of yesterday shaped the media world of today Now Media provides a comprehensive view of the development of media and the subsequent advancements into now digital media Each chapter is organized chronologically starting with print radio and television then moving to the now media of today and finally exploring possibilities for the media of the future Topics include the rise of social media uses of personal communication devices the film industry virtual reality digital advertising and the innovations that laid the groundwork for now media This fully updated fifth edition features new chapters on video games and the business of and careers in now media Discussions on rapidly evolving now media stakeholders such as influencers and YouTubers are included and attention is paid to AI throughout the book This book remains a key text and trusted resource for students and scholars of digital mass communication and communication history alike    Forest and Stream ,1894    **Relevant Query Answering over Streaming and Distributed Data** Shima Zahmatkesh,Emanuele Della Valle,2020-01-21 This book examines the problem of relevant query answering over the Web and provides a comprehensive overview of relevant query answering over streaming and distributed data In recent years Web applications that combine highly dynamic data streams with data distributed over the Web to provide relevant answers have attracted increasing attention Answering in a timely fashion i.e. reactively is one of the most important performance indicators especially when the distributed data is evolving The book proposes a solution that retains a local replica of the distributed data and offers various maintenance policies to refresh the replica over time A limited refresh budget guarantees the reactiveness of the system Focusing on stream processing and Semantic Web it appeals to scientists and graduate students in the field    Standard & Poor's Creditweek ,2006    *Streaming and Copyright Law* Lasantha Ariyarathna,2022-09-05 This book examines the challenges posed to Australian copyright law by streaming from the end user perspective It compares the Australian position with the European Union and United States to draw lessons from them regarding how they have dealt with streaming and copyright By critically examining the technological functionality of streaming and the failure of copyright enforcement against the masses it argues for strengthening end user rights The rising popularity of streaming has resulted in a revolutionary change to how digital content such as sound recordings cinematographic films and radio and television broadcasts is used on the internet Superseding the conventional method of downloading using streaming to access digital content has challenged copyright law because it is not clear whether end user acts of streaming constitute copyright infringement These prevailing grey areas between copyright and streaming often

make end users feel doubtful about accessing digital content through streaming. It is uncertain whether exercising the right of reproduction is appropriately suited for streaming given the ambiguities of embodiment and scope of substantial part. Conversely the fair dealing defence in Australia cannot be used aptly to defend end users acts of streaming digital content because end users who use streaming to access digital content can rarely rely on the defence of fair dealing for the purposes of criticism or review news reporting parody or satire or research or study. When considering a temporary copy exception end users are at risk of being held liable for infringement when using streaming to access a website that contains infringing digital content even if they lack any knowledge about the content's infringing nature. Moreover the grey areas in circumventing geo blocking have made end users hesitant to access websites through streaming because it is not clear whether technological protection measures apply to geo blocking. End users have a severe lack of knowledge about whether they can use circumvention methods such as virtual private networks to access streaming websites without being held liable for copyright infringement. Despite the intricacies between copyright and access to digital content the recently implemented website blocking laws have emboldened copyright owners while suppressing end users access to digital content. This is because the principles of proportionality and public interest have been given less attention when determining website blocking injunctions.
