**The Report: Nigeria 2024** Oliver Cornock, Nigeria's global strategic importance derives from its position as having both Africa's largest population and economy a reality undergirded by the entrepreneurial drive of its young population. Despite the lingering effects of the Covid 19 pandemic on the economy aggressive intervention programmes by the Central Bank of Nigeria and support from international partners fuelled a recovery in 2021 with GDP growing 3.6% that year and 3.3% in 2022 after contracting 1.8% in 2020. Growth is projected to drop slightly to 3.2% in 2023.

**Changing Federal Constitutions** Arthur Benz, Felix Knüpling, 2012-05-30 This book analyses constitutional change in federal and decentralizing countries from a comparative perspective. The authors identify structures, processes and strategies which have proven to favour successful constitutional amendment. Thereby the book enables public officials, scholars and students to learn from the constitutional reform experiences of other federal democracies and from practical suggestions how future reforms could be designed.

From the Contents: The Relevance of Constitutional Change, Constitutional Reform in Co-operative Federalism, Constitutional Reform in Federal Systems with Divided Societies, Devolution and Regionalisation in Federalising States, Processes of Ratification, Evolution after a Constitutional Reform, Conclusion.

Revised Statutes of the United States, Passed at the First Session of the Forty-third Congress, 1873-'74 United States, 1878

**The Report: Nigeria 2016** Oxford Business Group, 2016-10-06 Nigeria is the largest economy in Africa with a GDP of 487bn in 2015 according to the World Bank. The country asserted the mantle of the continent's largest economy in 2013 following a rebasing exercise. However its large population means that Nigeria remains a comparatively poor country in per capita terms with a lower GDP per capita than several of its sub-Saharan neighbors. Following a real GDP contract of 1.5% in 2016 the IMF forecasts that growth will reach 0.8% in 2017 and 1.9% in 2018. While growth began to pick up in the first half of 2017 Nigeria still has much work to do. However there is the sentiment that the economy has turned a corner and has begun to see a silver lining. Devaluation of the naira, rising inflation, the drop in oil revenues, the slowdown in oil production and the leader softening of growth.
