Real-Time Web Application Development Rami Verma, 2017-12-01 Design develop and deploy a real world web application by leveraging modern open source technologies This book shows you how to

use ASP.NET Core to build cross platform web applications along with SignalR to enrich the application by enabling real time communication between server and clients. You will use Docker to containerize your application, integrate with GitHub to package the application and provide continuous deployment to Azure's IaaS platform. Along the way, Real Time Web Application Development covers topics including designing a Materialize CSS theme using a test driven development approach with xUnit.net and securing your application with the OAuth 2.0 protocol. To further your understanding of the technology, you will learn logging and exception handling, navigation using view components and how to work with forms and validations. The rich code samples from this book can be used to retrofit or upgrade existing ASP.NET Core applications. What You Will Learn: Design and develop a real world web application. Implement security and data storage with OAuth2 and Azure Table Storage. Orchestrate real time notifications through SignalR. Use GitHub and Travis CI for continuous integration of code. Master Docker containerization and continuous deployment with Docker Cloud to Azure Linux virtual machines. Who This Book Is For: Developers and software engineers interested in learning an end to end approach to application development using Microsoft technologies.
