Choosing a

Database for Your Web Site John Paul Ashenfelter, 1999. The knowledge you need to select the right database solution for your Web site and the skills to make it happen. *Choosing a Database for Your Web Site* Expert John Paul Ashenfelter begins with a refresher course on database technology and design basics. He then appraises the major types of Web database tools and applications, describes how they work, explains how they can be used to provide an array of services and outlines criteria for choosing the right one for your site and your budget. Next he reviews a broad range of database products for every purpose and budget, including Desktop database tools with Web publishing capabilities such as Microsoft Access and Claris FileMaker Pro, HTML editors with database capabilities including Microsoft FrontPage, NetObjects Fusion and Allaire Homesite, Server based database applications like Allaire Cold Fusion, Microsoft Active Server Pages and Everyware Tango, Programming tools for creating Web database applications from scratch including CGI with Perl and Java based tools. The final section of the book ties it all together with case studies that show how the techniques and issues discussed in the book impact three real world Web sites. The companion Web site features Links to demo versions of products described in the book. All the code from the book. A regularly updated list of books, Web sites and other valuable resources.
