Soft Computing Applications Valentina Emilia Balas, Lakhmi C. Jain, Branko Kovačević, 2015-11-02 These volumes constitute the Proceedings of the 6th International Workshop on Soft Computing Applications or SOFA 2014 held on 24-26 July 2014 in Timisoara, Romania. This edition was organized by the University of Belgrade, Serbia, in conjunction with the Romanian Society of Control Engineering and Technical Informatics (SRAIT) Arad Section, The General Association of Engineers in Romania Arad Section, Institute of Computer Science Iasi Branch of the Romanian Academy, and IEEE Romanian Section. The Soft Computing concept was introduced by Lotfi Zadeh in 1991 and serves to highlight the emergence of computing methodologies in which the accent is on exploiting the tolerance for imprecision and uncertainty to achieve tractability, robustness, and low solution cost. Soft computing facilitates the use of fuzzy logic, neurocomputing, evolutionary computing, and probabilistic computing in combination, leading to the concept of hybrid intelligent systems. The combination of such intelligent systems, tools, and a large number of applications introduce a need for a synergy of scientific and technological disciplines in order to show the great potential of Soft Computing in all domains. The conference papers included in these proceedings, published post-conference, were grouped into the following areas of research: Image, Text, and Signal Processing; Intelligent Transportation Modeling and Applications; Biomedical Applications; Neural Network and Applications; Knowledge-Based Technologies for Web Applications; Cloud Computing; Security Algorithms and Computer Networks; Knowledge-Based Technologies; Soft Computing Techniques for Time Series Analysis; Soft Computing and Fuzzy Logic in Biometrics; Fuzzy Applications; Theory and Fuzzy Control; Business Process Management Methods and Applications in Electrical Engineering. The volumes provide useful information to professors, researchers, and graduated students in the area of soft computing techniques and applications as they report new research work on challenging issues. *Handbook of Research on Data Science and Cybersecurity Innovations in Industry 4.0 Technologies* Murugan, Thangavel, E., Nirmala, 2023-09-21 Disruptive innovations are now propelling Industry 4.0 and presenting new opportunities for value generation in all major industry segments. Industry 4.0 technologies, innovations in cybersecurity and data science, provide smart apps and services with accurate real-time monitoring and control. Through enhanced access to real-time information, it also aims to increase overall effectiveness, lower costs, and increase the efficiency of people, processes, and technology. The Handbook of Research on Data Science and Cybersecurity Innovations in Industry 4.0 Technologies discusses the technological foundations of cybersecurity and data science within the scope of the Industry 4.0 landscape and details the existing cybersecurity and data science innovations with Industry 4.0 applications, as well as the state of the art solutions with regard to both academic research and practical implementations. Covering key topics such as data science, blockchain, and artificial intelligence, this premier reference source is ideal for industry professionals, computer scientists, scholars, researchers, academicians, practitioners, instructors, and students. HVAC Repair Secrets Tim David, 2023-11-01 HVAC Repair Secrets will examine practical aspects

such as routine maintenance diagnosing problems effectively managing thermostats and various repair techniques By the end of this book you will possess the confidence and expertise to become a proficient HVAC enthusiast ensuring your system stays in top shape

Time to Think Small Todd Myers, 2022-11-01 This call to climate action examines ways we can leverage the growing power of smartphones and other technologies to become effective environmental stewards to protect threatened species reduce the risk from climate change and stop ocean plastic Personal technologies are creating what the Environmental Defense Fund calls a transformational shift in how we address environmental problems Time to Think Small explores how these brand new approaches are already playing a huge role in winning some of the most difficult and important environmental struggles of our day from fighting climate change to ensuring drinkable water for everyone to saving endangered animals to keeping plastic out of the ocean Learn how these technologies magnify and multiply the power everyone has as individuals to save our environment and how this tremendous power is not only growing but also has the huge benefit of being independent of sudden shifts in political leadership Drawing on two decades of environmental policy and a career working with endangered species mixed with his previous career in tech Myers looks at the different ways we can be empowered to find environmental solutions Time to Think Small reminds me of the first words spoken on the moon about small steps and giant leaps Todd Myers does in fact describe the giant strides from accumulated small steps that will help solve THE biggest long term problem facing humanity today If Big Government won't act WE CAN in our own small ways Donald Kroodsma Author of Birdsong for the Curious Naturalist The future of environmental stewardship depends on technology and innovation Todd Myers is a national leader on environmental policy and technology and understands how to create solutions that sidestep political gridlock John Connors former Microsoft CFO A much needed analysis of how we can solve complex global environmental problems by applying human ingenuity and why every step matters along the way Benji Backer President American Conservation Coalition Addressing climate change can be such a polarizing issue Myers's book has found a way to cut right through that with practical applicable actions that everyone can take to make a difference Kevin Wilhelm CEO Sustainable Business Consulting While the positions taken by Todd Myers may be disconcerting to an old school environmentalist such as myself his voice is one we need to hear in the conversation about climate change Myers makes a compelling argument that thinking small stimulates creativity and that nimble creative approaches can play a crucial role in achieving sustainability John S Farnsworth PhD Author of Nature Beyond Solitude Notes from the Field

Expanding Boundaries: Systems Thinking in the Built Environment Guillaume Habert, Arno Schlueter, 2016-08-15 Consuming over 40% of total primary energy the built environment is in the centre of worldwide strategies and measures towards a more sustainable future To provide resilient solutions a simple optimisation of individual technologies will not be sufficient In contrast whole system thinking reveals and exploits connections between parts Each system interacts with others on different scales materials components buildings cities and domains ecology economy and social Whole system

designers optimize the performance of such systems by understanding interconnections and identifying synergies The more complete the design integration the better the result In this book the reader will find the proceedings of the 2016 Sustainable Built Environment SBE Regional Conference in Zurich Papers have been written by academics and practitioners from all continents to bring forth the latest understanding on systems thinking in the built environment
