## Basics

### Positive & Negative Numbers

- Positive numbers are greater than 0 (for the right of 0 on a number line) and get larger as you move further away from 0; they may be written with or without a plus sign (+).
- Negative numbers are less than 0 (to the left of 0 on a number line) and get smaller as you move further away from 0; they must be written with a minus sign (-).

### Rules for Addition

- The sum of two positive numbers is a positive number:  

$$120 + 30 = 150$$
- The sum of two negative numbers is a negative number:  

$$-120 + -30 = -150$$
- The sum of one positive number and one negative number may be positive or negative, depending on which is larger; just remember that adding a negative number is the same as subtracting that number:  

$$120 + -100 = 120 - 100 = 20$$

### Rules for Subtraction

- Think of subtraction as addition of the opposite sign. Just change the subtraction sign to a addition sign, and write the opposite of the original number being subtracted and add it to the sum:  

$$120 - 30 = 120 + (-30) = -120 - (-30) = 120 + 30 = 150$$

### Rules for Multiplication

- The product of two positive numbers is a positive number:  

$$120 \times 30 = 360$$
- The product of two negative numbers is a positive number:  

$$-120 \times -30 = 360$$
- The product of one positive number and one negative number is a negative number:  

$$120 \times -30 = -360$$

### Rules for Division

- The quotient of two positive numbers is a positive number:  

$$360 \div 30 = 12$$
- The quotient of two negative numbers is a positive number:  

$$-360 \div -30 = 12$$
- The quotient of one positive number and one negative number is a negative number:  

$$360 \div -30 = -12$$

### Distributive Property

- A rule used in multiplication states that  $a(b + c) = ab + ac$ , or that  $a(b - c) = ab - ac$ . In other words, the first term outside the parentheses must be distributed to, or multiplied by, each term inside the parentheses.

Remember to use the rule for multiplying negative and positive numbers if negative numbers are included in the expression:  

$$120(-30 + 3) = 120 \times -30 + 120 \times 3 = -360 + 360 = 0$$

## Fractions

- Fractions represent parts of a whole; they are another way of showing division. The top number is called the numerator, and the bottom number is called the denominator.

### Three types of fractions:

- Proper fractions: The numerator is less than the denominator.  $\frac{1}{2}$
- Improper fractions: The numerator is greater than or equal to the denominator.  $\frac{2}{1}$
- Mixed numbers: Contains a whole number and a fraction part.  $1\frac{1}{2}$

Learn how to change a fraction to a form so that the only common factor between the numerator and denominator is 1 (also called reducing a fraction or writing it in reduced form):  

$$120/30 = \frac{120 \div 120}{30 \div 120} = \frac{1}{2}$$
 (the numerator and denominator have a common factor of 120, so divide both by 120 to get 1 in reduced form.  $\frac{1}{2}$  is their only common factor of 1, so this is reduced form)

Remember that when the common factor of a fraction and that same fraction is the same, then the fraction is in reduced form.

### Finding the Least Common Denominator (LCD)

- The LCD is the smallest number into which both or more denominators will divide evenly; this number is useful for performing operations (especially addition and subtraction) with fractions.

Ex: Given the fractions  $\frac{1}{2}$  and  $\frac{1}{3}$ , what is the LCD?  
 The LCD is the smallest number that is divisible by both 2 and 3; in this case, it is 6. In fact, 6 is 200% smaller than the denominators and denominators by whatever is needed to make each denominator equal to 200.  

$$\frac{1}{2} \times \frac{3}{3} = \frac{3}{6}$$
 and  $\frac{1}{3} \times \frac{2}{2} = \frac{2}{6}$ . The LCD is 6.

## Adding Fractions

### If the fractions have same denominators:

- Add the numerators, then denominator stays the same:  

$$120/30 + 30/30 = 150/30$$
 since the numerator and denominator are both divisible by 3, reduce the fraction  $\frac{150}{30} = \frac{5}{1}$

### If the fractions have different denominators:

- Find the LCD and write equivalent fractions for each fraction using the LCD:  

$$120/30 + 30/30 = 120/30 + 30/30$$
 since the denominator stays the same:  

$$120/30 = \frac{120 \div 120}{30 \div 120} = \frac{1}{2}$$
 so rewrite equivalent fractions with a denominator of 2:  $\frac{1}{2} + \frac{30}{30} = \frac{1}{2} + \frac{30}{30} = \frac{1}{2} + 1 = \frac{3}{2}$ . Now add the numerators:  $\frac{1}{2} + \frac{3}{2} = \frac{4}{2}$   
 Then it can be reduced by writing as an mixed number:  $\frac{4}{2} = 2\frac{0}{2}$

## Subtracting Fractions

### If the fractions have same denominators:

- Subtract the numerators, the denominator stays the same:  

$$120/30 - 30/30 = 90/30$$
 since the greatest common factor of the numerator and denominator is 1, the fraction is already in reduced form.

### If the fractions have different denominators:

- Find the LCD and write equivalent fractions for each fraction using the LCD:  

$$120/30 - 30/30 = 120/30 - 30/30$$
 since the denominator stays the same:  

$$120/30 = \frac{120 \div 120}{30 \div 120} = \frac{1}{2}$$
 so rewrite equivalent fractions with a denominator of 2:  $\frac{1}{2} - \frac{30}{30} = \frac{1}{2} - \frac{30}{30} = \frac{1}{2} - 1 = \frac{-1}{2}$ . Then subtract the numerators:  $\frac{1}{2} - \frac{-1}{2} = \frac{2}{2}$   
 Since the greatest common factor of the numerator and denominator is 1, the fraction is already in reduced form.

## Multiplying Fractions

- Multiply all numbers between whole numbers or mixed numbers to fraction form:  

$$120 \times 30 = 3600$$
 then multiply the denominators.
- Multiply the results in fraction form, then write the fraction in reduced form:  

$$3600/300 = 12$$
, first, write all numbers in fraction form:  $\frac{3600}{300}$ ; then multiply the numerators:  $3600 \times 300 = 1200000$ , then, multiply the denominators:  $300 \times 300 = 90000$ ; then divide the greatest common factor of the numerator and denominator, 1200000  $\div 120000 = 10$ .

## Dividing Fractions

- Multiply all numbers between whole numbers or mixed numbers to fraction form:  

$$120 \div 30 = 4$$
 then change the division sign to multiplication.
- Multiply the numerators, then multiply the denominators:  

$$120/30 = \frac{120}{30}$$
 the numbers are both already in fraction form, so change the division sign to multiplication sign and write the reciprocal of the second fraction:  $120/30 \times 30/120$ ; then multiply the numerators:  $120 \times 30 = 3600$ , multiply the denominators:  $30 \times 120 = 3600$ ; then write the results in fraction form:  $\frac{3600}{3600} = 1$  or one reduced fraction:  $\frac{1}{1}$ .

## Converting Fractions to Decimals

- Write all numbers (whole numbers or mixed numbers) to fraction form:  

$$120/30 = \frac{120}{30}$$
 then divide 120 by 30 to get 1.2; since there is a decimal point, then divide 120 by 300 to get 0.4; since there is no decimal point, then divide 120 by 3000 to get 0.04.

## Converting Fractions to Percentages

- Convert the fraction to a decimal, then multiply by 100%:  

$$120/30 = \frac{120}{30} = 1.2$$
 multiply by 100% to get 120%.

## **Nursing Math Quick Study Academic Introduction**

Free PDF Books and Manuals for Download: Unlocking Knowledge at Your Fingertips In todays fast-paced digital age, obtaining valuable knowledge has become easier than ever. Thanks to the internet, a vast array of books and manuals are now available for free download in PDF format. Whether you are a student, professional, or simply an avid reader, this treasure trove of downloadable resources offers a wealth of information, conveniently accessible anytime, anywhere. The advent of online libraries and platforms dedicated to sharing knowledge has revolutionized the way we consume information. No longer confined to physical libraries or bookstores, readers can now access an extensive collection of digital books and manuals with just a few clicks. These resources, available in PDF, Microsoft Word, and PowerPoint formats, cater to a wide range of interests, including literature, technology, science, history, and much more. One notable platform where you can explore and download free Nursing Math Quick Study Academic PDF books and manuals is the internets largest free library. Hosted online, this catalog compiles a vast assortment of documents, making it a veritable goldmine of knowledge. With its easy-to-use website interface and customizable PDF generator, this platform offers a user-friendly experience, allowing individuals to effortlessly navigate and access the information they seek. The availability of free PDF books and manuals on this platform demonstrates its commitment to democratizing education and empowering individuals with the tools needed to succeed in their chosen fields. It allows anyone, regardless of their background or financial limitations, to expand their horizons and gain insights from experts in various disciplines. One of the most significant advantages of downloading PDF books and manuals lies in their portability. Unlike physical copies, digital books can be stored and carried on a single device, such as a tablet or smartphone, saving valuable space and weight. This convenience makes it possible for readers to have their entire library at their fingertips, whether they are commuting, traveling, or simply enjoying a lazy afternoon at home. Additionally, digital files are easily searchable, enabling readers to locate specific information within seconds. With a few keystrokes, users can search for keywords, topics, or phrases, making research and finding relevant information a breeze. This efficiency saves time and effort, streamlining the learning process and allowing individuals to focus on extracting the information they need. Furthermore, the availability of free PDF books and manuals fosters a culture of continuous learning. By removing financial barriers, more people can access educational resources and pursue lifelong learning, contributing to

personal growth and professional development. This democratization of knowledge promotes intellectual curiosity and empowers individuals to become lifelong learners, promoting progress and innovation in various fields. It is worth noting that while accessing free Nursing Math Quick Study Academic PDF books and manuals is convenient and cost-effective, it is vital to respect copyright laws and intellectual property rights. Platforms offering free downloads often operate within legal boundaries, ensuring that the materials they provide are either in the public domain or authorized for distribution. By adhering to copyright laws, users can enjoy the benefits of free access to knowledge while supporting the authors and publishers who make these resources available. In conclusion, the availability of Nursing Math Quick Study Academic free PDF books and manuals for download has revolutionized the way we access and consume knowledge. With just a few clicks, individuals can explore a vast collection of resources across different disciplines, all free of charge. This accessibility empowers individuals to become lifelong learners, contributing to personal growth, professional development, and the advancement of society as a whole.
