Nwu Exam Papers 2014:

Assessing Academic Literacy in a Multilingual Society Albert Weideman, John Read, Theo du Plessis, 2020-11-02 South African universities face major challenges in meeting the needs of their students in the area of academic language and literacy. The dominant medium of instruction in the universities is English and to a much lesser extent Afrikaans but only a minority of the national population are native speakers of these languages. Nine other languages can be media of instruction in schools which makes the transition to tertiary education difficult enough in itself for students from these schools. The focus of this book is on procedures for assessing the academic language and literacy levels and needs of students not in order to exclude students from higher education but rather to identify those who would benefit from further development of their ability in order to undertake their degree studies successfully. The volume also aims to bring the innovative solutions designed by South African educators to a wider international audience.

Artificial Intelligence and Accounting Manjit Kour, Daniel P. Schutte, 2025-08-08 In the dynamic field of accounting where accuracy and productivity are critical, artificial intelligence (AI) integration has become a game changer and AI is set to affect every industry. With the speed at which technology is developing, a thorough manual that helps readers understand the complex world of AI in accounting is desperately needed. By offering a sophisticated grasp of how AI is changing the core ideas of accounting and financial management, this book bridges this knowledge gap. It explores the relationship between AI technology and accounting processes, revealing the significant influence and unrealised potential outside of traditional bookkeeping. This book delves into how AI is revolutionising accounting procedures. It explores the newest AI technologies and their uses in financial data processing, auditing, compliance, and forecasting, ranging from machine learning to predictive analytics. It ensures responsible AI integration by addressing biases, accountability, and transparency while emphasising ethical considerations. This book provides case studies, practical advice, and examples from the real world, guaranteeing that readers not only understand the theoretical foundations of AI in accounting but also get the knowledge necessary to apply and maximise these technologies within their professional domains by connecting theory and application. It offers a road map for traversing the accounting industry's AI frontier from using predictive analytics to make well-informed decisions to automating repetitive activities. This book will enable accountants, auditors, and financial analysts to prosper in the emerging AI-driven world.

African States Abu Bakarr Bah, 2025-03-01 Essays on the security challenges faced by African states. The central concern that shapes this edited volume is the nature of the African state. Contributors point to an interesting intersection of domestic and external issues that is framed as a globalized security situation. Individual chapters shed new insights on conflict drivers through case studies on Sierra Leone, Cameroon, Mali, Nigeria, and Somalia, as well as broader issues on the nature of African states. Arguments pivot on three issues which show the intersection of the domestic and external forces that render the African state as a global problem: a) the colonial roots of the state, b) problems of governance, and c) international and regional security.

imperatives By problematizing the African state and connecting the security challenges of African states to colonialism patrimonial rule and geopolitical security issues African States brings forth a new way of examining African states through the notion of glocalized security
