Object Detection Tracking Dynamic Processing:

Proceedings of the International Conference on Information Engineering and Applications (IEA) 2012 Zhicai Zhong, 2013-04-04 Information engineering and applications is the field of study concerned with constructing information computing intelligent systems mathematical models numerical solution techniques and using computers and other electronic devices to analyze and solve natural scientific social scientific and engineering problems Information engineering is an important underpinning for techniques used in information and computational science and there are many unresolved problems worth studying The Proceedings of the 2nd International Conference on Information Engineering and Applications IEA 2012 which was held in Chongqing China from October 26 28 2012 discusses the most innovative research and developments including technical challenges and social legal political and economic issues A forum for engineers and scientists in academia industry and government the Proceedings of the 2nd International Conference on Information Engineering and Applications presents ideas results works in progress and experience in all aspects of information engineering and applications

Computer Vision and Image Processing Deep Gupta, Kishor Bhurchandi, Subrahmanyam Murala, Balasubramanian Raman, Sanjeev Kumar, 2023-05-06 This two volume set CCIS 1776 1777 constitutes the refereed proceedings of the 7th International Conference on Computer Vision and Image Processing CVIP 2022 held in Nagpur India November 4 6 2022 The 110 full papers and 11 short papers were carefully reviewed and selected from 307 submissions Out of 121 papers 109 papers are included in this book The topical scope of the two volume set focuses on Medical Image Analysis Image Video Processing for Autonomous Vehicles Activity Detection Recognition Human Computer Interaction Segmentation and Shape Representation Motion and Tracking Image Video Scene Understanding Image Video Retrieval Remote Sensing Hyperspectral Image Processing Face Iris Emotion Sign Language and Gesture Recognition etc

Moving Object Detection Using Background Subtraction Soharab Hossain Shaikh, Khalid Saeed, Nabendu Chaki, 2014-06-20 This Springer Brief presents a comprehensive survey of the existing methodologies of background subtraction methods It presents a framework for quantitative performance evaluation of different approaches and summarizes the public databases available for research purposes This well known methodology has applications in moving object detection from video captured with a stationery camera separating foreground and background objects and object classification and recognition The authors identify common challenges faced by researchers including gradual or sudden illumination change dynamic backgrounds and shadow and ghost regions This brief concludes with predictions on the future scope of the methods Clear and concise this brief equips readers to determine the most effective background subtraction method for a particular project It is a useful resource for professionals and researchers working in this field

Technological Innovation for Connected Cyber Physical Spaces Luis M. Camarinha-Matos, Filipa Ferrada, 2023-06-24 This book constitutes the refereed proceedings of the 14th IFIP WG 5.5 SOCOLNET Advanced Doctoral Conference on Computing Electrical and Industrial Systems DoCEIS 2023

held in Monte da Caparica Portugal during July 5 7 2022 The 22 full papers presented were carefully reviewed and selected from 47 submissions The papers cover the following topics energy communities smart energy and power systems intelligent manufacturing health and biomedical information systems intelligent computational systems and electronics and communications

Frontier Computing Jason C. Hung, Neil Y. Yen, Jia-Wei Chang, 2022-05-23 This book gathers the proceedings of the 11th International Conference on Frontier Computing held in Seoul on July 13 17 2021 and provides comprehensive coverage of the latest advances and trends in information technology science and engineering It addresses a number of broad themes including communication networks business intelligence and knowledge management Web intelligence and related fields that inspire the development of information technology The respective contributions cover a wide range of topics database and data mining networking and communications Web and Internet of things embedded systems soft computing social network analysis security and privacy optical communication and ubiquitous pervasive computing Many of the papers outline promising future research directions and the book benefits students researchers and professionals alike Further it offers a useful reference guide for newcomers to the field

Recent Advances in Mobile Robotics Andon Topalov, 2011-12-14 Mobile robots are the focus of a great deal of current research in robotics Mobile robotics is a young multidisciplinary field involving knowledge from many areas including electrical electronic and mechanical engineering computer cognitive and social sciences Being engaged in the design of automated systems it lies at the intersection of artificial intelligence computational vision and robotics Thanks to the numerous researchers sharing their goals visions and results within the community mobile robotics is becoming a very rich and stimulating area The book *Recent Advances in Mobile Robotics* addresses the topic by integrating contributions from many researchers around the globe It emphasizes the computational methods of programming mobile robots rather than the methods of constructing the hardware Its content reflects different complementary aspects of theory and practice which have recently taken place We believe that it will serve as a valuable handbook to those who work in research and development of mobile robots

Advanced Image Processing Techniques and Applications Kumar, N. Suresh, Sangaiah, Arun Kumar, Arun, M., Anand, S., 2017-02-10 Today the scope of image processing and recognition has broadened due to the gap in scientific visualization Thus new imaging techniques have developed and it is imperative to study this progression for optimal utilization *Advanced Image Processing Techniques and Applications* is an essential reference publication for the latest research on digital image processing advancements Featuring expansive coverage on a broad range of topics and perspectives such as image and video steganography pattern recognition and artificial vision this publication is ideally designed for scientists professionals researchers and academicians seeking current research on solutions for new challenges in image processing

Proceedings of the ACM ... International Workshop on Video Surveillance & Sensor Networks, 2004

Object Detection and Tracking Using Dynamic Image Processing M Nagy Amr, H Zayed Hala, Ahmed Ali, 2015-12-21 This book illustrates object detection and

tracking technology It encompasses a variety of problems such as noise in images cluttered background complex object motion partial or full occlusions illumination changes as well as real time processing requirements These problems are studied by several tracking algorithms which tackle them using diverse algorithms Object tracking deals with the state estimation of one or more objects Object tracking is required by many vision applications such as people tracking vehicle tracking animal tracking etc People tracking are also done for surveillance at locations such as airports rail terminals landmarks buildings homes etc Vehicle tracking is used in traffic monitoring delay estimation reroute planning etc Tracking vehicles is one of the major importance when designing autonomous vehicles *Mechanical and Electronics Engineering III*
