Reimagine Pricing Jan Y. Yang, 2025-06-11 This book highlights the transformative potential of AI-enabled pricing, showing how it empowers businesses to unlock revenue, optimize customer experiences, and gain a competitive edge. By combining cutting-edge AI technologies with actionable strategies, it offers a comprehensive roadmap for organizations looking to move from reactive manual pricing processes to proactive data-driven systems that predict, adapt, and create value in real time. Focused on practical applications, the book bridges the gap between technological innovation and real-world implementation. It features a unique blend of strategic insights, technical examples including Python code and AI workflows, and case studies from industries such as retail, travel, and manufacturing. These examples demonstrate how companies have increased margins, reduced churn, and driven customer loyalty by leveraging AI. It also explores fast-evolving trends like autonomous systems, blockchain transparency, and ecosystem-driven pricing, making it essential reading for professionals eager to future-proof their pricing strategies. A key contribution of the book is its focus on the human element of AI adoption. It addresses challenges like resistance to change, ethical considerations in pricing fairness, and building trust with both internal teams and customers. By reframing AI as an enabler rather than a replacement, the book equips pricing professionals to transition from tactical roles to strategic leadership, fostering collaboration between human intuition and machine intelligence. The book raises provocative questions: How can businesses harness AI without compromising ethics or transparency? What skills will pricing teams need to thrive in an AI-driven future? And how can organizations align AI pricing with broader strategic goals? It answers these questions by offering clear, actionable solutions and a vision for integrating AI into the heart of business operations, transforming pricing from a functional necessity into a strategic differentiator. Designed for business leaders, pricing experts, and AI enthusiasts, this book is not just a guide; it's a call to action to embrace the future of AI-enabled pricing with confidence, creativity, and purpose.

Commission of Labor,1900 Leadership 2.0 in processes of a sustainable change Prof. Dr. Michael Kurwan,2025-06-30 Document from the year 2025 in the subject Leadership and Human Resources Leadership language English abstract In order to successfully implement sustainable changes in a company in the context of change processes strong leadership is required at the top of a company which should have a great deal of empathy and a sure instinct in order to position the company in the market in the long term and profitably In order to successfully shape these sustainable changes it will not be the famous power of the leader of the past

but will only work with the involvement of employees in the new world of work in the knowledge age which is characterized by digitalization and artificial intelligence This new form of leadership is also referred to as Leadership 2.0 in which it is important to retain top performers and in particular key personnel in the company in the long term which is a very challenging leadership task in HR management In change processes a fundamental distinction must be made between incremental change management and radical change management While incremental change takes place continuously and is integrated into everyday working life radical change represents a strategic realignment of the company which is largely associated with staff reductions and is intended to change the corporate culture This is particularly true in the case of restructuring where cost cutting programs play a decisive role in ensuring the long term survival of the company Employees are more willing to go along with incremental change also known as continuous improvement than radical change as they could also be affected by staff cuts This fuels employees fears and therefore often leads to high staff turnover
