HISTORY OF STREAMING

Streaming refers to the practice of delivering content, such as video or audio files, over a network, as opposed to download. It involves a digital connection to a device or computer, such as a smartphone, that facilitates the transfer of content to the user. The content can be delivered via a variety of methods, such as over-the-air television, cable television, or satellite television. Streaming has become a popular method of delivery for a variety of reasons, including convenience, cost-effectiveness, and the ability to access content from anywhere in the world.

The idea of streaming began in the 1980s, when the concept was first used by the BBC. At that time, television stations were using personal computers to store video content. This was a common method of storing video content, as it was a cost-effective way to store large amounts of data. The BBC used this method to store video content, and it soon became the standard for television stations around the world. The BBC's success with streaming led to the development of other streaming services, such as Netflix and Amazon Prime.

By the late 1990s, streaming had become a popular method of delivery for television content. Services like Netflix and Amazon Prime had become the most popular streaming platforms, and they continue to be the most popular today.

Streaming has become a popular method of delivery for television content, as it is a cost-effective way to store video content. It is also a convenient way to access content, as it can be viewed on a variety of devices, such as smartphones, tablets, and laptops.
