Innovation, Between Science and Science Fiction Thomas Michaud, 2017-07-17 Fantasy and science fiction are both involved in the process of innovation in techno scientific societies. Long regarded as a hindrance to rationality and to science science fiction has become the object of praise in recent decades. Innovative organizations use science fiction to stimulate the creativity of their teams and more and more entrepreneurs are using its influence to develop innovation. Scientific practice relies in part on an imaginary dimension. The mapping of the technical imagination of science fiction has become an important strategic issue as has its patentability. The conquest of space the construction of cyberspace and virtual reality biotechnologies and nanotechnologies are all at the center of futuristic fictions that participate in scientific speeches and discoveries.

Miller, 2019-03-28. In preparation for this book and to better understand our screen based digital world, Miller only accessed information online for seven years. *On the End of Privacy* explores how literacy is transformed by online technology that lets us instantly publish anything that we can see or hear. Miller examines the 2010 suicide of Tyler Clementi, a young college student who jumped off the George Washington Bridge after he discovered that his roommate spied on him via webcam. With access to the text messages, tweets and chatroom posts of those directly involved in this tragedy, Miller asks why did no one intervene to stop the spying. Searching for an answer to that question leads Miller to online porn sites, the invention of Facebook, the court martial of Chelsea Manning, the contents of Hillary Clinton's email server, Anthony Weiner's sexted images, Chatroulette and more as he maps out the changing norms governing privacy in the digital age. ***Kansas Wildlife & Parks***, 2012. ***Meteorite!***, 2005.
