New Stream Cipher Designs Matthew Robshaw, Olivier Billet, 2008-07-16 This state of the art survey presents the outcome of the eSTREAM Project which was launched in 2004 as part of ECRYPT the European Network of Excellence in Cryptology EU Framework VI The goal of eSTREAM was to promote the design of new stream ciphers with a particular emphasis on algorithms that would be either very fast in software or very resource efficient in hardware Algorithm designers were invited to submit new stream cipher proposals to eSTREAM and 34 candidates were proposed from around the world Over the following years the submissions were assessed with regard to both security and practicality by the cryptographic community and the results were presented at major conferences and specialized workshops dedicated to the state of the art of stream ciphers This volume describes the most successful of the submitted designs and over 16 chapters provides full specifications of the ciphers that reached the final phase of the eSTREAM project The book is rounded off by two implementation surveys covering both the software and the hardware oriented finalists

PC Magazine, 2008-07 *Towards a neuroscience of social interaction* Ulrich Pfeiffer, Bert Timmermans, Kai Vogeley, Chris Frith, Leonhard Schilbach, The burgeoning field of social neuroscience has begun to illuminate the complex biological bases of human social cognitive abilities However in spite of being based on the premise of investigating the neural bases of interacting minds the majority of studies have focused on studying brains in isolation using paradigms that investigate offline social cognition i e social cognition from a detached observer's point of view asking study participants to read out the mental states of others without being engaged in interaction with them Consequently the neural correlates of real time social interaction have remained elusive and may paradoxically represent the dark matter of social neuroscience More recently a growing number of researchers have begun to study online social cognition i e social cognition from a participant's point of view based on the assumption that there is something fundamentally different when we are actively engaged with others in real time social interaction as compared to when we merely observe them Whereas for offline social cognition interaction and feedback are merely a way of gathering data about the other person that feeds into processing algorithms inside the agent it has been proposed that in online social cognition the knowledge of the other at least in part resides in the interaction dynamics between the agents Furthermore being a participant in an ongoing interaction may entail a commitment toward being responsive created by important differences in the motivational foundations of online and offline social cognition In order to promote the development of the neuroscientific investigation of online social cognition this Frontiers Research Topic

aims at bringing together contributions from researchers in social neuroscience and related fields whose work involves the study of at least two individuals and sometimes two brains rather than single individuals and brains responding to a social context. Specifically this Research Topic will adopt an interdisciplinary perspective on what it is that separates online from offline social cognition and the putative differences in the recruitment of underlying processes and mechanisms. Here an important focal point will be to address the various roles of social interaction in contributing to and at times constituting our awareness of other minds. For this Research Topic we therefore solicit reviews, original research articles, opinion and method papers which address the investigation of social interaction and go beyond traditional concepts and ways of experimentation in doing so. While focusing on work in the neurosciences this Research Topic also welcomes contributions in the form of behavioral studies, psychophysiological investigations, methodological innovations, computational approaches, developmental and patient studies. By focusing on cutting edge research in social neuroscience and related fields this Frontiers Research Topic will create new insights concerning the neurobiology of social interaction and holds the promise of helping social neuroscience to really go social.

Aspen Plus Kamal I. M. Al-Malah, 2022-10-12 ASPEN PLUS Comprehensive resource covering Aspen Plus V12.1 and demonstrating how to implement the program in versatile chemical process industries. Aspen Plus Chemical Engineering Applications facilitates the process of learning and later mastering Aspen Plus the market leading chemical process modeling software with step by step examples and succinct explanations. The text enables readers to identify solutions to various process engineering problems via screenshots of the Aspen Plus platforms in parallel with the related text. To aid in information retention the text includes end of chapter problems and term project problems, online exam and quiz problems for instructors that are parametrized i.e. adjustable so that each student will have a standalone version and extra online material for students such as Aspen Plus related files that are used in the working tutorials throughout the entire textbook. The second edition of Aspen Plus Chemical Engineering Applications includes information on various new features that were embedded into Aspen Plus V12.1 and existing features which have been modified. Aspen Custom Modeler (ACM) covering basic features to show how to merge customized models into Aspen Plus simulator. New updates to process dynamics and control and process economic analysis since the first edition was published. Vital areas of interest in relation to the software such as polymerization, drug solubility, solids handling, safety measures and energy saving. For chemical engineering students and industry professionals the second edition of Aspen Plus Chemical Engineering Applications is a key resource for understanding Aspen Plus and the new features that were added in version 12.1 of the software. Many supplementary learning resources help aid the reader with information retention.
