These apps allow you to enjoy a night out with dinner and a show with friends without having a dime in your pocket. Venmo is one such app. It is a digital wallet that gives users the opportunity to send money from your bank account for free to either pay bills or repay a friend by sending money back to their Venmo account. It came about in March 2009 as a system through which funds could be paid through text messages and is said to be safe for users but has since been refined and is now very popular among the social class.

The Helpfulness of Vine and Incentivized Reviews on Amazon](#) Tom Keller,2021-06-01 Master s Thesis from the year 2016 in the subject Business economics Offline Marketing and Online Marketing grade 1 7 University of Mannheim Lehrstuhl f r Business to Business Marketing Sales Pricing language English abstract The goal of this study is to analyze the impact if any these two types of incentivization based reviews have on the perception of the review by the review reader because these reviews could have a bias or at least could be perceived to have one For this the metric of review helpfulness which is the percentage of helpful votes a review has collected from its readers is analyzed accounting for a number of independent and confounding variables Another aspect that is analyzed in the course of this study is the role of the product in this regard This study is structured as follows in 2 Literature Review the overarching research domain electronic word of mouth is illustrated and previous studies about the helpfulness of online consumer reviews and found effects are presented Also credibility in the context of electronic word of mouth is discussed In the course of 3 Conceptual Background two theories used to develop the tested hypotheses are described one of which is frequently used in context of the helpfulness of online consumer reviews After this the theoretical importance of the three most important observed variables in the statistical model is explained and the tested hypotheses are developed accordingly Data Analysis a comprehensive outline about the entire empirical aspects of this study is given including the choice of confounding variables decisions in regard to the data collection sample finalization regression diagnostics and the final results of the hypotheses tests **Online Consumer Reviews** Hessamedin Vali,2016 Consumer reviews as an important source of product information are becoming popular in online markets Due to lack of physical access to the product and variation among buyer preferences there is always the risk of selecting an inappropriate product that doesn t meet a customer s needs If this happens not only does the buyer face an uncomfortable situation but also the seller will be in jeopardy of losing potential customers as well as paying warrantyrelated costs and expenses In the second chapter the focus is on different types of conflicting information among reviews as factors that affect their informativeness and accuracy of a purchasing decision Cognitive load theory explains that when a type of review conflict is easy to capture but cannot be related to a product like a conflicting star rating the cognitive load is too low and the product information cannot be captured Conflicting attributes can be easily related to a product and they are easy to capture therefore the cognitive load is medium and the delivered information is high In the third chapter the focus is on the effect of a review s repeating purchase cues on the overall perceived value of the product In summary when a positive review includes repeating purchase cues positive

reviews are perceived more helpful than negative reviews. Finally the value of review dimensions and review format on the review's perceived value is studied. In general, comparison reviews are perceived to be more valuable than non-comparison reviews. However, in the field of consumer reviews, comparing reviews provides too much information and overwhelms the potential buyer. By categorizing information in a table format, the overwhelming issue can be managed so comparing reviews in a table format is perceived more valuable than existing traditional reviews.
