**National Library of Medicine Current Catalog** National Library of Medicine (U.S.),1965 **Paranoia: A Study in Diagnosis** A. Fried,J. Agassi,2012-12-06 There is a curious parallel between the philosophy of science and psychiatric theory The so called demarcation question which has exercised philosophers of science over the last decades posed the problem of distinguishing science proper from non science in particular from metaphysics from pseudo science from the non rational or irrational or from the untestable or the empirically meaningless In psychiatric theory the demarcation question appears as a problem of distinguishing the sane from the insane the well from the mentally ill The parallelism is interesting when the criteria for what fails to be scientific are seen to be congruent with the criteria which define those psychoses which are marked by cognitive failure In this book Dr Yehuda Fried and Professor Joseph Agassi a practicing psychiatrist and a philosopher of science respectively focus on an extreme case of psychosis paranoia as an essentially intellectual disorder that is as one in which there is a systematic and chronic delusion which is sustained by logical means They write Paranoia is an extreme case by the very fact that paranoia is by definition a quirk of the intellectual apparatus a logical delusion p 2

**Disaster Psychiatry** Frederick J. Stoddard,Anand Pandya,Craig L. Katz,2012-09-24 It is becoming increasingly common for psychiatrists to be among the first responders when disaster strikes More than 800 psychiatrists are believed to have responded to the 9 11 attacks The first clinical manual on the best practices for helping those affected by disaster Disaster Psychiatry Readiness Evaluation and Treatment offers an explicit and practical discussion of the evidence base for recommendations for psychiatric evaluation and interventions for disaster survivors Disaster is defined by the World Health Organization as a severe disruption ecological and psychosocial that greatly exceeds a community's capacity to cope This manual takes an all hazards approach to disasters and has application to natural occurrences such as earthquakes and hurricanes accidental technological events such as airplane crashes and willful human acts such as terrorism The field of disaster psychiatry is more important than ever in response to disasters such as the Deepwater Horizon oil spill in the Gulf of Mexico and the 2010 earthquake in Haiti Today disaster psychiatry encompasses a wide spectrum of clinical interests ranging from public health preparations and early psychological interventions to psychiatric consultation to surgical units and psychotherapeutic interventions to alleviate stress in children and families after school shootings hurricanes or civil conflict Although disaster mental health is still a young field research is gradually yielding methods for accurately identifying valid relationships among preexisting risk factors postdisaster mental health problems and effective interventions With its practical approach to readiness response and intervention and its focus on evidence based recommendations for psychiatric evaluation and interventions Disaster Psychiatry Readiness Evaluation and Treatment is an invaluable manual for educator and student alike The manual draws on a variety of sources including the peer reviewed scientific literature the clinical wisdom imparted by front line psychiatrists and other mental health professionals and the experiences of those who have

organized disaster mental health services including the American Psychiatric Association and Disaster Psychiatry Outreach  
Each chapter provides clear and concise information and in depth review followed by helpful study questions and answers  
This book has been developed to give professionals the knowledge they need to respond swiftly and appropriately when
