The Care of the Baby J. P. Crozer Griffith, 2018-03-24
 Excerpt from The Care of the Baby A Manual for Mothers and Nurses Containing Practical Directions for the Management of Infancy and Childhood in Health and in Disease
 It seems often to be taken for granted that the young mother will understand by a sort of intuition the care which her baby requires as though it needed no more than a newborn animal
 Of some lower order of life
 The fact is that such a little animal slight though its needs are when compared with those of a baby has a parent which

by instinct is far better able to care for it than is the human mother for her child About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
