New Directions in Cognitive Linguistics Vyvyan Evans, Stephanie Pourcel, 2009 Nearly three decades since the publication of the seminal *Metaphors We Live By* Cognitive Linguistics is now a mature theoretical and empirical enterprise with a voluminous associated literature It is arguably the most rapidly expanding school in modern linguistics and one of the most exciting areas of research within the interdisciplinary project known as cognitive science As such Cognitive Linguistics is increasingly attracting a broad readership both within linguistics as well as from neighbouring disciplines including other cognitive and social sciences and from disciplines within the humanities This volume contains over 20 papers by leading experts in cognitive linguistics which survey the state of the art and new directions in cognitive linguistics The volume is divided into 5 sections covering all the traditional areas of study in cognitive linguistics as well as newer areas including applications and extensions Sections include Approaches to semantics Approaches to metaphor and blending Approaches to grammar Language embodiment and cognition Extensions and applications of cognitive linguistics **Cognitive**

**Linguistics** Mario Brdar, Stefan Thomas Gries, 2011 Cognitive Linguistics is not a unified theory of language but rather a set of flexible and mutually compatible theoretical frameworks This volume is of interest to scholars and students wishing to inform themselves about the state and possible future developments of Cognitive Linguistics *Ten Lectures on the*

*Elaboration of Cognitive Grammar* Ronald Langacker, 2017-07-31 This book reviews the basic claims and descriptive constructs of Cognitive Grammar outlines major themes in its ongoing development and applies these notions to central problems in grammatical analysis The initial review covers conceptual semantics the conceptual characterization of grammatical categories grammatical constructions and the architecture of a unified theory of language structure Main themes in the framework's development include the dynamicity of language structure grammar as the implementation of semantic functions systems of opposing elements to serve those functions and organization in strata representing successive elaborations of a baseline structure The descriptive application of these notions centers on nominal and clausal structure with special emphasis on nominal grounding **New Directions in Cognitive Science** Theodore M. Cognitive Linguistics and Lexical Change Natalya I. Stolova, 2015-03-27 This monograph offers the first in depth lexical and semantic analysis of motion verbs in their development from Latin to nine Romance languages Spanish French Italian Portuguese Romanian Catalan Occitan Sardinian and Raeto Romance demonstrating that the patterns of innovation and continuity attested in the data can be accounted for in cognitive linguistic terms At the same time the study illustrates how the insights gained from Latin and Romance historical data have profound implications for the cognitive approaches to language in particular for Leonard Talmy's motion framing typology and George Lakoff and Mark Johnson's conceptual metaphor theory The book should appeal to scholars interested in historical Romance linguistics cognitive linguistics and lexical change Approaches to Language, Culture, and Cognition M. Yamaguchi, D. Tay, B.

Blount,2014-08-28 Approaches to Language Culture and Cognition aims to bring cognitive linguistics and linguistic anthropology closer together calling for further investigations of language and culture from cognitively informed perspectives against the backdrop of the current trend of linguistic anthropology *New Directions in Cognitive Linguistics : Usage-based Perspectives on Lexical and Constructional Semantics* Maarten Lemmens,2021 *Constructions in Cognitive Contexts* Franziska Günther,2016-11-07 In what ways are language cognition and perception interrelated Do they influence each other This book casts a fresh light on these questions by putting individual speakers cognitive contexts i e their usage preferences and entrenched patterns of linguistic knowledge into the focus of investigation It presents findings from original experimental research on spatial language use which indicate that these individual specific factors indeed play a central role in determining whether or not differences in the current and or habitual linguistic behaviour of speakers of German and English are systematically correlated with differences in non linguistic behaviour visual attention allocation to and memory for spatial referent scenes These findings form the basis of a new speaker focused usage based model of linguistic relativity which defines language perception cognition effects as a phenomenon which primarily occurs within individual speakers rather than between speakers or speech communities **Cognitive Processes in Eye Guidance** Geoffrey D. M. Underwood,2005 Whether reading looking at a picture or driving how is it that we know where to look next how does the human visual system calculate where our gaze should be directed in order to achieve our cognitive aims This book brings together leading vision scientists studying eye movements across a range of activities such as reading driving computer activities and chess It provides groundbreaking new research that will help us understand how it is that we know where to move our eyes and thereby better understand the cognitive processes underlying these activities **A Cognitive Approach to Learning Disabilities** D. Smith,1988 **Cognition and Eye Movements** Rudolf Groner,Paul Fraisse,1982 Multilingual Cognition and Language Use Luna Filipović,Martin Pütz,2014-06-15 This volume provides a multifaceted view of certain key themes in multilingualism research today and offers future directions for this research area in the context of the multilingual development of individuals and societies The selection of studied languages is eclectic e g Amondawa Cantonese Bulgarian Dene Dutch Eipo Frisian German Mandarin Chinese M ori Russian Spanish and Yukatek among others they are typologically diverse and they are contrasted from a variety of perspectives such as cognitive development aging acquisition grammatical and lexical processing and memory This collection also illustrates novel insights into the linguistic relativity debate that multilingual studies can offer such as new and revealing perspectives on some well known topics e g colour categorisation or language transfer The critical and
