Neurosis The Logic Of A Metaphysical Illness:

Neurosis Wolfgang Giegerich, 2013-09-01 Psychoanalysis began over a century ago as a treatment for neurosis Rooted in the positivistic mindset of the medicine from which it stemmed it trained its empiricist gaze directly upon the symptoms of the malaise only to be seduced into attributing it to causes as numerous as there are aspects of human experience Edifying as this was for our understanding of the life of the psyche it left the sickness of the soul that was its actual subject matter the neurosis which it was supposed to be about out of its purview The crux of this problem was of a conceptual nature As psychology increasingly gave up on its constituting concept its concept of soul it succumbed to the same extent to treating its patients without an adequate concept of what both it and neurosis were about Attention was paid to mishaps and traumas the vicissitudes of development and the Oedipus complex But neurosis according to the thesis of this ground breaking book comes from the soul even is soul the soul in its untruth Indeed both it and the modern field of psychology are successors of the soul forms that preceded them religion and metaphysics with the difference that psychology's reluctance to recognize and take responsibility for its status as such has been matched by the neurotic soul's clinging to obsolete metaphysical categories even as the often quite ordinary life disappointments of its patients are inflated with ABSOLUTE importance The folie a deux has been on a massive scale Owing their provenance to the supplement they each provide the other psychology and neurosis are entwined in a Gordian knot the cutting of which requires insight into the logic that pervades both Taking up this sword Giegerich exposes and critiques the metaphysics that neurosis indulges in even as he returns psychology to the soul not of course to the soul as some no longer credible metaphysical hypostasis but as the logically negative life of the mind and power of thought Using several fairy tales as models for the logic of neurosis he brilliantly analyses its enchanting background processes exposing thereby in a most lively and thoroughgoing manner the spiteful cunning by which the neurotic soul against its already existing better judgement betrays its own truth Topics include the historicity of neurosis its soulful purpose as a general cultural phenomenon its internal logic functioning and enabling conditions as well as the Sacred Festival drama character of symptomatic suffering the theology of neurosis and the neurotic as the figure of modernity's exemplary man A collection of vignettes descriptive of various kinds of neurotic presentation routinely met with in the consulting room is also included in an appendix under the heading Neurotic Traps

A Psychological Inquiry into the Meaning and Concept of Forgiveness Jennifer Sandoval, 2017-02-17 This book explores the psychological nature of forgiveness for both the subjective ego and what Jung called the objective psyche or soul Utilizing analytical archetypal and dialectical psychological approaches the notion of forgiveness is traced from its archetypal and philosophical origins in Greek and Roman mythology through its birth and development in Judaic and Christian theology to its modern functional character as self help commodity relationship remedy and global necessity Offering a deeper understanding of the concept of true forgiveness as a soul event Sandoval reveals the transformative nature of forgiveness and the implications this notion has on

the self and analytical psychology [The Neurosis of Psychology](#) Wolfgang Giegerich,2020-04-13 This first volume of The Collected English Papers of Wolfgang Giegerich takes its title from Giegerich's ground breaking paper On the Neurosis of Psychology or The Third of the Two originally published in Spring Journal in 1977 The third referred to in the title is psychology itself as the theory in which the two patient and analyst are contained as they engage with one another in the analytic process By applying to psychology itself the ideas that analytical psychology draws upon when thinking about the patient Giegerich establishes the basis for a psychology that defines itself as the discipline of interiority Topics include Neumann's history of consciousness Jung's thought of the self the question of a Jungian identity projection the origin of psychology and more *Psychology as the Discipline of Interiority* Jennifer M. Sandoval,John C. Knapp,2017-02-03

Psychology as the Discipline of Interiority is the first collection of essays dedicated to the study and application of Psychology as the Discipline of Interiority a new wave within Analytical Psychology which pushes off from the work of C G Jung and James Hillman The book reflects upon the notion of psychology developed by German psychoanalyst Wolfgang Giegerich whose Hegelian turn sheds light on the notion of soul or psyche and its inner logic and thought forming a radical new basis from which to ground a modern psychology with soul The book's theme the psychological difference is applied to topics including analytical theory clinical practice and contemporary issues ranging from C G Jung's *Mysterium* to case studies to the nuclear bomb and the Shoah Psychology as the Discipline of Interiority expounds upon the complexity depth and innovativeness of Giegerich's thought reflecting the various ways in which international scholars have creatively explored a speculative psychology founded upon the notion of soul The contributors here include clinical psychologists Jungian analysts and international scholars With a new chapter by Wolfgang Giegerich and a foreword by David Miller Psychology as the Discipline of Interiority will be essential reading for depth and clinical psychologists Jungian psychoanalysts in practice and in training and academics and students of post Jungian studies It is also relevant reading for all those interested in the history of philosophical thought and what it means to think in the highly sophisticated and technological world of the twenty first century **Essays on "The Soul's Logical Life" in the Work of Wolfgang Giegerich** Jennifer M Sandoval,Colleen EL-Bejjani,Pamela J Power,2023-12-22 Essays on The Soul's Logical Life in the Work of Wolfgang Giegerich Psychology as the Discipline of Interiority is the second collection of essays dedicated to the study and application of psychology as the discipline of interiority a new wave within analytical psychology which pushes off from the work of C G Jung and James Hillman Reflecting upon the notion of psychology developed by German psychoanalyst Wolfgang Giegerich whose Hegelian turn sheds light on the notion of soul or the objective psyche and its inner logic and thought forms a radical new basis from which to ground a modern psychology with soul The book explores the theme of the soul's logical life as it displays itself in various modern phenomena from overwhelming anxiety cryptocurrency the dreams of Japanese college students and contemporary psychoanalysis to myth music social movements and the question and relevance of truth in psychology and

consciousness The authors comprising clinical psychologists teachers Jungian analysts and international scholars aim to reveal and convey the dialectical inner workings and speculative logic of the modern soul Essays on The Soul's Logical Life in the Work of Wolfgang Giegerich Psychology as the Discipline of Interiority will be essential reading for depth and clinical psychologists Jungian psychoanalysts and academics and students of post Jungian studies and for all those interested in what it means to think in the highly sophisticated and technological world of the twenty first century The Neurosis of Psychology Wolfgang Giegerich,2020-04-13 This first volume of The Collected English Papers of Wolfgang Giegerich takes its title from Giegerich's ground breaking paper On the Neurosis of Psychology or The Third of the Two originally published in Spring Journal in 1977 The third referred to in the title is psychology itself as the theory in which the two patient and analyst are contained as they engage with one another in the analytic process By applying to psychology itself the ideas that analytical psychology draws upon when thinking about the patient Giegerich establishes the basis for a psychology that defines itself as the discipline of interiority Topics include Neumann's history of consciousness Jung's thought of the self the question of a Jungian identity projection the origin of psychology and more **Neurosis** Wolfgang Giegerich,2020-01-06 Psychoanalysis began over a century ago as a treatment for neurosis Rooted in the positivistic mindset of the medicine from which it stemmed it trained its empiricist gaze directly upon the symptoms of the malaise only to be seduced into attributing it to causes as numerous as there are aspects of human experience Edifying as this was for our understanding of the life of the psyche it left the sickness of the soul that was its actual subject matter the neurosis which it was supposed to be about out of its purview The crux of this problem was of a conceptual nature As psychology increasingly gave up on its constituting concept its concept of soul it succumbed to the same extent to treating its patients without an adequate concept of what both it and neurosis were about Attention was paid to mishaps and traumas the vicissitudes of development and the Oedipus complex But neurosis according to the thesis of this ground breaking book comes from the soul even is soul the soul in its untruth Indeed both it and the modern field of psychology are successors of the soul forms that preceded them religion and metaphysics with the difference that psychology's reluctance to recognize and take responsibility for its status as such has been matched by the neurotic soul's clinging to obsolete metaphysical categories even as the often quite ordinary life disappointments of its patients are inflated with absolute importance The folie deux has been on a massive scale Owing their provenance to the supplement they each provide the other psychology and neurosis are entwined in a Gordian knot the cutting of which requires insight into the logic that pervades both Taking up this sword Giegerich exposes and critiques the metaphysics that neurosis indulges in even as he returns psychology to the soul not of course to the soul as some no longer credible metaphysical hypostasis but as the logically negative life of the mind and power of thought Using several fairy tales as models for the logic of neurosis he brilliantly analyses its enchanting background processes exposing thereby in a most lively and thoroughgoing manner the spiteful cunning by which the neurotic soul against its already existing better

judgement betrays its own truth Topics include the historicity of neurosis its soulful purpose as a general cultural phenomenon its internal logic functioning and enabling conditions as well as the Sacred Festival drama character of symptomatic suffering the theology of neurosis and the neurotic as the figure of modernity's exemplary man A collection of vignettes descriptive of various kinds of neurotic presentation routinely met with in the consulting room is also included in an appendix under the heading Neurotic Traps

What is Soul? Wolfgang Giegerich, 2020-01-06 Rooted in the metaphysics of bygone times the notion of soul in our Western tradition is packed with associations and meanings that are incompatible with the anthropological and naturalistic thinking that prevails in modernity Whereas treatises of old conceived of the soul as an infinite immaterial substance which was the ground of man's hope for eternal salvation modern psychology has for the most part discarded the concept in favor of more tangible touchstones such as the emotions desires and attachments which characterize man as a finite bodily existing positive fact An exception to this trend has been the analytical psychology of C G Jung Against the positivistic spirit of his times Jung insisted upon a psychology with soul that is a psychology based upon the hypothesis of an autonomous mind In this volume Wolfgang Giegerich once again takes up the Jungian commitment to a psychology with soul Agreeing with Jung that the soul concept is indispensable for a truly psychological psychology he supplements and re-orientates the Jungian approach to both this concept and the phenomenology of the soul by means of a whole series of nuanced discussions that are as rigorous as they are thoroughgoing The result is nothing short of a tour de force Tarrying with the negative Giegerich's particular contribution resides in his showing the movement against the soul to be the soul's own doing In animus moments of itself consciousness in the form of philosophy and Enlightenment reason turned upon itself as religion and metaphysics Far from abolishing the soul however these incisive negations were themselves negated As if dancing upon its own demise the soul came home to itself not as an invisible metaphysical substance but more invisibly still as the logically negative evaporation of that substance into the form of subject or even better said into psychology

The Soul Always Thinks Wolfgang Giegerich, 2020-05-05 C G Jung regarded the soul to be a reality in its own right which reflects itself in all manner of images and events symbols and traditions In this fourth volume of his Collected English Papers Giegerich recalls the soul to the inwardness of its own home territory by bringing out the thought character of the self-creating self-unfolding logical life that it is In addition to clarifying what thought means for psychology and analyzing certain misconceptions surrounding the topic of soul and thought a challenging thesis concerning the limitation of an imaginal anima only approach in psychology given the essential historicity of the soul is carefully argued while examining at the same time such topics as the end of meaning and the birth of man anima mundi and time the metamorphosis of the gods and the logical steps involved in the transition from childhood to adulthood and from a psychological oneness with nature to modern alienation from nature The book also discusses the notion of the soul's logical life and shows in action the psychological procedure of absolute negative interiorization of phenomena into their soul and

truth in a number of in depth examinations of particular phenomena e g Heraclitus dictum about the soul s depth the leap into the solid stone the negativity of the stone which is not a stone In thorough going critical engagements with other authors in the field it demonstrates specific instances where psychology fails to do its job due to faulty presuppositions above all psychology s failure to face the modern world It emphasizes the active role of the mind in soul making as the making of psychic reality It addresses the questions of the future of psychology and whether progress in psychology is possible The Soul Always Thinks Wolfgang Giegerich,2020-05-05 C G Jung regarded the soul to be a reality in its own right which reflects itself in all manner of images and events symbols and traditions In this fourth volume of his Collected English Papers Giegerich recalls the soul to the inwardness of its own home territory by bringing out the thought character of the self creating self unfolding logical life that it is In addition to clarifying what thought means for psychology and analyzing certain misconceptions surrounding the topic of soul and thought a challenging thesis concerning the limitation of an imaginal anima only approach in psychology given the essential historicity of the soul is carefully argued while examining at the same time such topics as the end of meaning and the birth of man anima mundi and time the metamorphosis of the gods and the logical steps involved in the transition from childhood to adulthood and from a psychological oneness with nature to modern alienation from nature The book also discusses the notion of the soul s logical life and shows in action the psychological procedure of absolute negative interiorization of phenomena into their soul and truth in a number of in depth examinations of particular phenomena e g Heraclitus dictum about the soul s depth the leap into the solid stone the negativity of the stone which is not a stone In thorough going critical engagements with other authors in the field it demonstrates specific instances where psychology fails to do its job due to faulty presuppositions above all psychology s failure to face the modern world It emphasizes the active role of the mind in soul making as the making of psychic reality It addresses the questions of the future of psychology and whether progress in psychology is possible Wolfgang Giegerich is a Jungian analyst now living in Berlin and the author of numerous books among them What Is Soul and Neurosis The Logic of a Metaphysical Illness Giegerich s Collected English Papers include The Neurosis of Psychology Vol I Technology and the Soul Vol 2 Soul Violence Vol 3 The Soul Always Thinks Vol 4 The Flight into the Unconscious Vol 5 and Dreaming the Myth Onwards Vol 6 all Routledge **Soul-Violence** Wolfgang Giegerich,2020-04-17 All steps forward in the improvement of the human psyche have been paid for by blood Further to this statement from C G Jung Wolfgang Giegerich s third volume of Collected English Papers shows that the soul is not merely the innocent recipient or victim of violence it also produces itself through violent deeds and expresses itself through violent acts Beginning in primordial times with the ritual spilling of blood in animal and human sacrifice a light was kindled within the darkness of what would otherwise have been mere biological existence the light of consciousness mindedness and the soul And following upon this in the clearance thus created the soul attained new statuses of itself on the historic battlefields of war and revolution First order killings gave way to second order killings the

killings of metaphysics and philosophy Turning around upon itself even as it violently engaged those adversarial others through whom its self relation was mediated the soul learned to self critically cut into itself It was in this way as the inwardness of the blood that was paid out for it that psychology emerged Topics include ritual slaughter as primordial soul making shadow integration and the rise of psychology blood brotherhood and blood revenge the alchemy of history Kafka s In the Penal Colony child sacrifice Islamic terrorism and the animus as negation with special reference to Bluebeard Wolfgang Giegerich is a Jungian analyst now living in Berlin and the author of numerous books among them What Is Soul and Neurosis The Logic of a Metaphysical Illness Giegerich s Collected English Papers include The Neurosis of Psychology Vol I Technology and the Soul Vol 2 Soul Violence Vol 3 The Soul Always Thinks Vol 4 The Flight into the Unconscious Vol 5 and Dreaming the Myth Onwards Vol 6 all Routledge *Soul-Violence* Wolfgang Giegerich,2020-04-17 All steps forward in the improvement of the human psyche have been paid for by blood Further to this statement from C G Jung Wolfgang Giegerich s third volume of Collected English Papers shows that the soul is not merely the innocent recipient or victim of violence it also produces itself through violent deeds and expresses itself through violent acts Beginning in primordial times with the ritual spilling of blood in animal and human sacrifice a light was kindled within the darkness of what would otherwise have been mere biological existence the light of consciousness mindedness and the soul And following upon this in the clearance thus created the soul attained new statuses of itself on the historic battlefields of war and revolution First order killings gave way to second order killings the killings of metaphysics and philosophy Turning around upon itself even as it violently engaged those adversarial others through whom its self relation was mediated the soul learned to self critically cut into itself It was in this way as the inwardness of the blood that was paid out for it that psychology emerged Topics include ritual slaughter as primordial soul making shadow integration and the rise of psychology blood brotherhood and blood revenge the alchemy of history Kafka s In the Penal Colony child sacrifice Islamic terrorism and the animus as negation with special reference to Bluebeard Technology and the Soul Wolfgang Giegerich,2020-04-13 C G Jung famously declared that it is not the psyche that is in us but rather we who are in the psyche Updating this insight the second volume of Wolfgang Giegerich s Collected English Papers examines what must be regarded as the most all encompassing presence of our lives today technological civilization Living within technology we now find that what we had formerly regarded as psychological phenomena our feelings and emotions images and dreams have been superseded by phenomena bearing the predicates artificial manufactured and virtual Television the World Wide Web and the nuclear bomb are cases in point Far from being mere things among things each of these has transformed the whole of man s world relation Though deplored by many as soulless on this account these phenomena it may be argued are the real gods the real archetypes of the soul today Psychologically it is not what we think and feel about them that counts but what they think what they feel Wolfgang Giegerich is a Jungian analyst now living in Berlin and the author of numerous books among them What Is Soul and Neurosis The Logic of a Metaphysical

Illness Giegerich's Collected English Papers include The Neurosis of Psychology Vol I Technology and the Soul Vol 2 Soul Violence Vol 3 The Soul Always Thinks Vol 4 The Flight into the Unconscious Vol 5 and Dreaming the Myth Onwards Vol 6 all Routledge

"Dreaming the Myth Onwards" Wolfgang Giegerich, 2020-03-06 The fundamental importance of Christianity for Jung is well documented in his writings and letters For the whole of his long career the great psychologist had wrestled with what he called the great snake of the centuries the burden of the human mind the problem of Christianity By comparison his statements about Hegel are quite scarce Both topics nevertheless have in common that they elicited from Jung radical accusations accusations not presented in the calm tone of a psychological scholar but fired by a deep seated personal affect that propelled Jung to wish to dream the myth onwards that is to move to a new his own improved and corrected version of Christianity Rather than merely portraying and elucidating Jung's views this volume critically examines his theses and arguments by means of a series of close readings and by confronting his claims with the texts on which his interpretations are based The guiding principle in the spirit of which the author's investigation is conducted is the question of the needs of the soul and the standards of true psychology While constantly bearing these needs and standards in mind diverse topics are discussed in depth Jung's interpretation of a dream he had had about being unable to completely bow down before the highest presence his thesis concerning the patriarchal neglect of the feminine principle his views about the alleged one sidedness of Christianity the recalcitrant Fourth and the reality of Evil his understanding of the Trinity and the spirit his rejection of Hegel and of speculative thought and his reaction to the modern doubt that has killed religious faith A companion to the preceding volume The Flight into the Unconscious the essays collected here continue its radical critique of Jung's psychology project yielding not only deep insights into Jung's personal religiosity and into what ultimately drove his psychology project as a whole but granting as well a more sophisticated understanding of the psychological potential and telos of the Christian idea

The Flight into The Unconscious Wolfgang Giegerich, 2020-03-06 Psychological analysis usually sets its sights upon the patient or upon cultural phenomena such as myths literature or works of art The essays in this volume by contrast have another addressee another subject matter psychology itself Deeply informed by Jung's insight regarding the discipline's lack of an objective vantage point outside and beyond the psyche their Jungian author again and again turns Jung's contribution to psychology around upon itself in the spirit of an immanent critique Cutting to the quick the question is put in its constitution as psychology is Jungian psychology up to the level of what its insight into psychology's lack of an Archimedean point would require Are the interpretations it gives of its various subject matters alchemy religion the unconscious and the rest matched by its interpretation of itself Has its meeting itself in them had consequences for itself consequences in terms of the fathoming of its own truth Or clinging to the standpoint of empirical observer did it ultimately demur with regards to the question of their truth and its own this despite Jung's having characterized his work as an opus divinum Topics include Jung's psychology project as a response to the condition of the world the smuggling inherent in the

logic of the unconscious the closure and setting free dialectic of alchemy and psychology the blindness to logical form problematic the faultiness of the opposition Individual and Collective Jung's communion fiasco his thinking the thought of not thinking the veracity of his Red Book the disenchantment complex and as indicated in the title of this volume Jung's psychology project as a counter speculative flight into the unconscious Technology and the Soul Wolfgang Giegerich, 2020-04-13 C G Jung famously declared that it is not the psyche that is in us but rather we who are in the psyche Updating this insight the second volume of Wolfgang Giegerich's Collected English Papers examines what must be regarded as the most all encompassing presence of our lives today technological civilization Living within technology we now find that what we had formerly regarded as psychological phenomena our feelings and emotions images and dreams have been superseded by phenomena bearing the predicates artificial manufactured and virtual Television the World Wide Web and the nuclear bomb are cases in point Far from being mere things among things each of these has transformed the whole of man's world relation Though deplored by many as soulless on this account these phenomena it may be argued are the real gods the real archetypes of the soul today Psychologically it is not what we think and feel about them that counts but what they think what they feel Working With Dreams Wolfgang Giegerich, 2020-11-29 This book is about the practice of working with dreams Rather than presenting a general theory about dreams it focuses on the dream as phenomenon and raises the question how we must look at dreams if our approach is supposed to be a truly psychological one So far most essays on and the practice of Jungian dream interpretation have paradoxically centered around the person of the dreamer and not around the dream itself Dreams were used as a means to understand the analysand and what is going on in him or her Jung's fundamental shift from his earlier person based psychology and pre alchemy stance to his mature soul based psychology informed by the hermetic logic of alchemy has not been followed which was already noted by Jung himself My later and more important work as it seems to me is still left untouched in its primordial obscurity The present study is based decidedly on the stance of mature Jung and his very different views about dreams His most crucial insights in this regard include that in dreams the soul speaks about itself not about the dreamer that the dream is its own interpretation and therefore needs to be circumambulated rather than translated into the language of psychology and everyday life and that dream images have everything they need within themselves rather than needing associations from the dreamer's daily life This book discusses in detail what all this means in practice and what it demands of the psychologist A decisive transposition away from ordinary consciousness a crossing to the other side of the river is required of the consciousness that wants to approach dreams psychologically Numerous aspects of dreams and special questions that come up in working with dreams are discussed At the end of this book our working with dreams is situated in the wider question of the psychological task in general by exploring Jung's insistence that psychology has to transcend the consulting room Hillman's move From mirror to window and in Plato's parable the revolutionary move out of and return to the cave While limited to the topic of dreams this book may also serve as

an indirect introduction to an understanding of psychology as a psychology with soul Jung or as the discipline of interiority
