Multimedia Services in Intelligent Environments George A. Tsihrintzis, Maria Virvou, Lakhmi C. Jain, 2013-05-23
Multimedia services are now commonly used in various activities in the daily lives of humans. Related application areas include services that allow access to large depositories of information: digital libraries, e-learning and e-education, e-government and e-governance, e-commerce and e-auctions, e-entertainment, e-health and e-medicine and e-legal services, as well as their mobile counterparts, i.e. m-services. Despite the tremendous growth of multimedia services over the recent years, there is an increasing demand for their further development. This demand is driven by the ever-increasing desire of society for easy accessibility to information in friendly, personalized and adaptive environments. In this book at hand, we examine recent Advances in Recommender Systems. Recommender systems are crucial in multimedia services as they aim at protecting the service users from information overload. The book includes nine chapters which present various recent research results in recommender systems. This research book is directed to professors, researchers, application engineers and students of all disciplines who are interested in learning more about recommender systems, advancing the corresponding state of the art and developing recommender systems for specific applications. *New Directions in Intelligent Interactive Multimedia* George A. Tsihrintzis, Maria Virvou, 2008-06-18. This book summarizes the works and new research results presented at the First International Symposium on Intelligent Interactive Multimedia Systems and Services (KES IIMSS 2008) organized by the University of Piraeus and its Department of Informatics in conjunction with KES International, Piraeus, Greece, July 9-11, 2008. The aim of the symposium was to provide an internationally respected forum for scientific research into the technologies and applications of intelligent interactive multimedia systems and services. Besides the Preface, the book contains sixty-four (64) chapters. The first four (4) chapters in the book are printed versions of the keynote addresses of the invited speakers of KES IIMSS 2008. Besides the invited speaker chapters, the book contains fifteen (15) chapters on recent Advances in Multimedia Data Analysis, eleven (11) chapters on Reasoning Approaches, nine (9) chapters on Infrastructure of Intelligent Interactive Multimedia Systems and Services, fourteen (14) chapters on Multimedia Applications and eleven (11) chapters on Quality of Interactive Multimedia Services. Artificial Intelligence-Empowered Software Engineering 2024 Maria Virvou, Yoshinori Tanabe, Lakhmi C. Jain, 2025-11-05. This book contains extended versions of the works and new research results presented at the 15th International Conference on Artificial Intelligence empowered Software Engineering (AIESE2024) formerly Joint Conference on Knowledge based Software Engineering (JCKBSE), University of Piraeus, August 27-30, 2024, Greece. AIESE formerly JCKBSE is a well-established international biennial conference that focuses on the applications of Artificial Intelligence on Software Engineering. Its 15th edition was organized by the Department of Informatics of the University of Piraeus, Greece. This book is a valuable resource for experts and researchers in the field of artificial intelligence empowered and knowledge-based software engineering. It is also valuable to general readers in the fields of artificial and

Linkage in Evolutionary Computation Ying-ping Chen, 2008-09-10 In recent years the issue of linkage in GEAs has garnered greater attention and recognition from researchers Conventional approaches that rely much on ad hoc tweaking of parameters to control the

search by balancing the level of exploitation and exploration are grossly inadequate As shown in the work reported here such parameters tweaking based approaches have their limits they can be easily fooled by cases of triviality or peculiarity of the class of problems that the algorithms are designed to handle Furthermore these approaches are usually blind to the interactions between the decision variables thereby disrupting the partial solutions that are being built up along the way
