Phraseology in Foreign Language Learning and Teaching Fanny Meunier,Sylviane Granger,2008-02-06 This book addresses the key role of phraseology in second language acquisition and instruction It is divided into three main sections Extracting and Describing Phraseological Units investigates the role played by native and learner corpora in the extraction and description of multiword units two initial and crucial steps in informing language pedagogy Learning Phraseological Units deals with the learning aspect an oft neglected yet essential dimension of phraseology in second foreign language pedagogy this section also addresses issues in new literacies and Recording and Exploiting Phraseological Units focuses on pedagogical tools notably monolingual and bilingual dictionaries and textbooks This stimulating collection presents cutting edge research in the field and identifies major avenues for future theoretical and applied work It is of particular relevance to researchers and teachers interested in the patterned nature of language

Corpora and Language Teaching Karin Aijmer,2009 Articles in this volume discuss the role and effectiveness of corpora and corpus linguistic techniques for language teaching but also deal with broader issues such as the relationship between corpora and second language teaching and how the different perspectives of foreign language teachers and applied linguists can be reconciled

The Grammar and Lexis of Conversational Informal English in Advanced Textbooks María Dolores Fernández Gavela,2015-04-01 The Grammar and Lexis of Conversational Informal English in Advanced Textbooks defends the view that the acquisition of conversational English depends highly on the kind of materials available to L2 learners The need to acquire a proficient competence in English is growing exponentially in an incessantly demanding society but it is the oral skill and more specifically the ability to communicate in everyday situations that learners are calling for The current learning process nonetheless is not particularly effective as is shown in the data collected by the Eurobarometer and published in June 2012 which shows that only 38% of the Europeans surveyed were able to maintain a conversation in English although 67% believed it to be the most useful language to learn for personal development The present study supports the idea expressed in The Common European Framework of Reference for Languages which states that a language is learnt reactively following the instructions and carrying out the activities prescribed for them by teachers and by textbooks 2001 141 Consequently these materials should reflect the everyday use of informal discourse and allow learners to analyse understand and interpret the different underlying messages conveyed by means of lexico syntactic as well as paralinguistic elements The book is divided into seven

chapters in which various different linguistic aspects of conversation are dealt with In the opening chapters spoken language is presented and approached as a multidimensional entity particularly as the sum of lexico syntactic and socio linguistic elements The following chapters provide a description of the main characteristics of conversational English based on corpus informed grammars and publications The final chapter analyses twenty ESL textbooks in order to determine how corpus data has influenced the materials designed for the acquisition of conversational discourse
