Toutkoushian, Ulrich Teichler, 2011-06-06 This ground breaking and exhaustive analysis of university ranking surveys scrutinizes their theoretical bases methodological issues societal impact and policy implications providing readers with a deep understanding of these controversial comparators The authors propose that university rankings are misused by policymakers and institutional leaders alike They assert that these interested parties overlook the highly problematic internal logic of ranking methodologies even as they obsess over the surveys assessment of their status The result is that institutions suffer from short termism realigning their resources to maximize their relative rankings While rankings are widely used in policy and academic discussions this is the first book to explore the theoretical and methodological issues of ranking itself It is a welcome contribution to an often highly charged debate Far from showing how to manipulate the system this collection of work by key researchers aims to enlighten interested parties *The Manager's Guide to Statistics, 2018 Edition* Erol Peköz, 2018-04-03 Finally an introduction to statistics for aspiring managers leaders and decision makers who do not need to know all the details of statistical theory and just want real applications and commonsense explanations using words and diagrams without a jumble of Greek letters and mathematical formulas The focus is on conceptual understanding simplicity and counterintuitive phenomena that can occur This textbook is for an undergraduate or MBA introductory statistics course and covers summary statistics probability hypothesis testing correlation multiple regression and includes an Excel add in for histograms and stepwise regression The author Erol Pek z teaches on the faculty of the Boston University School of Management and is the author of numerous technical articles and the recent book *A Second Course in Probability* *Global University Rankings* T.
