Phil Edwards, MEL, Aston University, Science Park, UK. Review in *The Statistician* Vol 40 No 3 1991. This volume is an extremely valuable contribution to survey methodology. It has many virtues. First it provides a framework in which survey errors can be segregated by sources. Second, Groves has skillfully synthesized existing knowledge, bringing together in an easily accessible form empirical knowledge from a variety of sources. Third, he has managed to integrate into a common framework the contributions of several disciplines. For example, the work of psychometricians and cognitive psychologists is made relevant to the research of econometricians as well as the field experience of sociologists. Finally, but not least, Groves has managed to present all this in a style that is accessible to a wide variety of readers, ranging from survey specialists to policymakers.
