11. Procedure: A PL/SQL block that can receive and return multiple values. Function: A PL/SQL block that typically returns one value and can be used in SQL and PL/SQL statements. Package: Groups procedures and functions together.

Database trigger: A PL/SQL block that fires automatically based on a DML action on a specified table.

12. Yes, regardless of the development tool, using stored program units is still an advantage, especially when performing SQL tasks because it increases overall efficiency by reducing network transmissions.

13. A middle-tier in the three-tier model serves as the application server, and application code is stored on the application server instead of the client machine.

14. A user interface consists of windows that users see to interact with the application. If a developer uses Oracle tools, such as Oracle Forms, PL/SQL provides all the program code that responds to user events, such as clicking a button.
