Energy as a Sociotechnical Problem Christian Büscher, Jens Schippl, Patrick Sumpf, 2018-09-21 Energy as a Sociotechnical Problem offers an innovative approach to equip interdisciplinary research on sociotechnical transitions with coherence and focus The book emphasizes sociotechnical problems in three analytical dimensions In the control dimension contributing authors examine how control can be maintained despite increasing complexity and uncertainty e g in power grid operations or on energy markets In the change dimension the authors explore if and how change is possible despite the need for stable orientation e g regarding discourses real world labs and learning Finally in the action dimension the authors analyze how the ability to act on a permanent basis is

sustained despite opaqueness and ignorance exemplified by the work on trust capabilities or individual motives Drawing on contributions from engineering economics philosophy political science psychology and sociology the book assembles a range of classic and current themes including innovation resilience institutional economics design or education Energy as a Sociotechnical Problem presents the ongoing transformation of the energy complex as a multidimensional process in which the analytical dimensions interact with each other in shaping the energy future As such this book will be of great interest to students and scholars of energy transitions energy science and environmental social science more generally as well as to practitioners working within the field of energy policy

Networked Governance and Transatlantic Relations Gabriella Paar-Jakli, 2014-04-29 In today's complex and interconnected world scholars of international relations seek to better understand challenges spurred by intensified global communication and interaction The complex connectedness of modern society and politics compels us to investigate the pattern of interconnections among actors who inhabit social and political spaces Gabriella Paar-Jakli's study aims to advance theory and practice by examining the networks used by specialists in North America and Europe to achieve their policy goals in the area of science and technology Her book suggests that to overcome policy problems transnationally three critical factors should be considered First as science and technology policy becomes increasingly critical to resolving global issues it should be regarded as an integral element of the foreign policy process Second as liberal international relations theory argues the increasing role of NGOs must be taken seriously alongside states as vital agents of policy reform Third as transatlantic relations remain center to maintaining the global order they must be reconsidered Paar-Jakli assesses the role of digital networks as facilitators of regional cooperation Utilizing various techniques of social network analysis her research indicates an active and structurally discernible network in cyberspace among transatlantic organizations and demonstrates the role of virtual networks as facilitators of cooperative arrangements in transatlantic relations Paar-Jakli's original research uses social network analysis to investigate transatlantic cooperation a new approach that will be noteworthy to network and transatlantic scholars as well as policymakers
