Jilke, Gregg G. Van Ryzin, 2017-07-27 An overview of experimental research and methods in public management and their impact on theory research practices and substantive knowledge *Improving Procedural Justice in Anti-Dumping Investigations* Abdulkadir Yilmazcan, 2024-05-16 By synthesizing both theoretical and empirical insights this book offers a distinctive perspective on procedural justice within the context of anti dumping investigations The book highlights the disjunction between the

provisions outlined in the World Trade Organization's Anti Dumping Agreement (ADA) and the practical encounters faced by stakeholders such as exporters, regulatory bodies and legal experts affiliated with the WTO. Employing a mixed method approach, the research encompasses a comprehensive doctrinal analysis of procedural complexities alongside empirical investigations involving key stakeholders such as WTO legal experts, Chinese exporters and investigating authorities. Furthermore, this book underscores the potential for enhancing procedural justice through either a comprehensive reform of the ADA or concrete measures such as a standardized anti dumping questionnaire. Such improvements offered in the book have the potential to curtail the misuse of anti dumping investigations, consequently mitigating a substantial number of disputes that might be brought before the WTO's Dispute Settlement Mechanism.

Bureaucracy and Red Tape Barry Bozeman, 2000. For basic text supplement use in Bureaucracy, Public Administration, Organization Theory, Policy Implementation, and American Government courses. Demonstrating our need to think more deeply about our dissatisfactions with bureaucracy, this proactive text combines original explanations of bureaucratic red tape with prescription and case examples, challenging students to develop a deeper understanding of bureaucracy as a set of trade-offs among politics, accountability, and efficiency. Fair-minded in approach, it distinguishes bureaucratic normalities from bureaucratic pathologies in the internal and inter-organizational management of organizations, helping students discern the difference between which rules and regulations are reasonable, accountability or coordination mechanisms, and which in fact can be labeled red tape.
