

PLANTING DESIGN

This diagram clearly reflects the change of plant structures from the highway to the landscape buffers. By placing trees and shrubs such as box trees and yew hedges near Ports, and the highway to provide shading for passengers and block noise from the traffic. In park green spaces, we can mostly implement small trees and shrubs to enhance the visual environment. Near the highway, we need to keep the existing natural systems to protect the existing watersheds and soil protection.

Sustainable Design for the Built Environment Rob Fleming, Saglinda H Roberts, Chitsanzo Isaac, 2024-11-08 Sustainable Design for the Built Environment marks the transition of sustainable design from a specialty service to the mainstream approach for creating a healthy and resilient built environment. This groundbreaking and transformative textbook introduces sustainable design in a clear, concise, easy-to-read format. This new edition includes fully updated exercises and online resources, an increased focus on diversity, equity, and inclusion in design, more international examples, perspectives, and approaches, enhanced full colour visuals, and additional resources for further study. The book takes the reader deep into the foundations of sustainable design and creates a holistic and integrative approach addressing the social, cultural, ecological, and aesthetic aspects in addition to the typical performance driven goals. The first section of this book is thematically structured around the origins, principles, and frameworks of sustainable design, aimed at inspiring a deeper, broader, and more inclusive view of sustainability. The second section examines strategies such as biophilia and biomimicry, adaptation and resilience, and health and well-being, including recent developments following the COVID-19 pandemic. The third section examines the application of sustainability principles from the global, urban, district, and site building and human scales, illustrating how a systems thinking approach allows sustainable design to span varied contexts and multiple scales. This textbook is intended to inspire a new vision for the future that unites human activity with natural processes to form a regenerative, coevolutionary model for sustainable design. Supported by additional resources including additional reading for each chapter and classroom assignments, this book will be essential reading for students of sustainability and sustainable design.

Design Thinking Pedagogy Cara Wrigley, Genevieve Moseley, 2022-08-15 The problems facing society today are complex, multifaceted, and require crossing multiple disciplinary boundaries. As such, these problems call for interdisciplinary collaboration, including new and different combinations of skills and knowledge. Currently, tertiary education providers are not well positioned to develop these interdisciplinary capabilities at a rate commensurate with the speed of contemporary change. This book places design thinking as the catalyst to create change in the tertiary education sector and to build

interdisciplinary skill sets that are required for the graduate of the future. By presenting a series of case studies and drawing on global experts in the field, this book investigates pedagogical approaches, disciplinary facilitation, practice, curriculum integration, and a framework for understanding design thinking pedagogy within tertiary education. Focusing on how educational institutions can produce innovative graduates with the ability to traverse disciplinary constraints, this book will be essential reading for research students, academics, and industry practitioners.

Creative Placemaking Cara Courage, Anita McKeown, 2018-10-03 This book makes a significant contribution to the history of placemaking, presenting grassroots to top-down practices and socially engaged, situated, artistic practices and arts-led spatial inquiry that go beyond instrumentalising the arts for development. The book brings together a range of scholars to critique and deconstruct the

notion of creative placemaking presenting diverse case studies from researcher practitioner funder and policymaker perspectives from across the globe It opens with the creators of the 2010 White Paper that named and defined creative placemaking Ann Markusen and Anne Gadwa Nicodemus who offer a cortically reflexive narrative on the founding of the sector and its development This book looks at vernacular creativity in place a topic continued through the book with its focus on the practitioner and community placed projects It closes with a consideration of aesthetics metrics and from the editors a consideration of the next ten years for the sector If creative placemaking is to contribute to places in the making and encourage citizenled agency new conceptual frameworks and practical methodologies are required This book joins theorists and practitioners in dialogue advocating for transdisciplinary resilient processes

McDade, Elizabeth Douthitt Byrne, 2013 *Landscape at Berkeley* was published in conjunction with the centennial anniversary celebration of the Department of Landscape Architecture and Environmental Planning. Through scholarly essays, reminiscences and illustrations, the monograph represents both commemoration of the Department and a greater understanding of the Berkeley campus. It also endeavors to trace Berkeley's role in the history of the profession and design education in the United States. *Landscape at Berkeley* focuses on the first hundred years of teaching landscape architecture and environmental planning on the UC Berkeley campus and captures an important localized perspective as well as primary source evidence that will enhance broader examinations of the major issues that have shaped the profession and the environments we inhabit and visit. Furthermore, it will contribute to the increasing scholarly interest in and literature on the history of design education, particularly that of landscape architecture and environmental planners. As such, it will appeal to a diverse audience of scholars, students, design professionals, policy makers, and the general public. The monograph includes a comprehensive narrative history and schematic timeline of key events, scholarly essays exploring the activities of UC Berkeley students and faculty within the broader context of design history, education, research, practice, policy, and leadership, reminiscences of current and former faculty and students, and a color portfolio of student work illustrating curricular goals, program competitions, and the formative work of many individuals who have contributed to the profession locally, regionally, nationally, and internationally.

Values in Landscape Architecture and Environmental Design M. Elen Deming, 2015-11-09 The successful realization of diversity, resilience, usefulness, profitability, or beauty in landscape design requires a firm understanding of the stakeholders' values. This collection, which incorporates a wide variety of geographic locations and cultural perspectives, reinforces the necessity for clear and articulate comprehension of the many factors that guide the design process. As the contributors to this collection reveal, dominant and emerging social, political, philosophical, and economic concerns perpetually assert themselves in designed landscapes, from manifestations of class consciousness in Napa Valley vineyards to recurring themes and conflicts in American commemorative culture as seen in designs for national memorials. One essay demonstrates the lasting impact of the doctrine of Manifest Destiny on the culture and spaces of the Midwest, while another considers the shifting historical narratives that led to the de-domestication and subsequent re-wilding of the Oostvaardersplassen in the Netherlands. These eleven essays help foster the ability to conduct a balanced analysis of various value systems and produce a lucid visualization of the necessary tradeoffs. Offering an array of case studies and theoretical arguments, *Values in Landscape Architecture and Environmental Design* encourages professionals and educators to bring self-awareness, precision, and accountability to their consideration of landscape designs.
