**Pearson's Magazine**, 1927-07 *Intelligent Systems and Applications* Kohei Arai, 2021-08-06 This book presents Proceedings of the 2021 Intelligent Systems Conference which is a remarkable collection of chapters covering a wider range of topics in areas of intelligent systems and artificial intelligence and their applications to the real world. The conference attracted a total of 496 submissions from many academic pioneering researchers scientists industrial engineers and students from all around the world. These submissions underwent a double blind peer review process. Of the total submissions 180 submissions have been selected to be included in these proceedings. As we witness exponential growth of computational intelligence in several directions and use of intelligent systems in everyday applications this book is an ideal resource for reporting latest innovations and future of AI. The chapters include theory and application on all aspects of artificial intelligence from classical to intelligent scope. We hope that readers find the book interesting and valuable it provides the state of the art intelligent methods and techniques for solving real world problems along with a vision of the future research.

**Pearson's Magazine**, 1896 **Alternative Theoretical Frameworks for Mathematics Education Research** Elizabeth de Freitas, Margaret Walshaw, 2016-08-31 This book explicates some of the fundamental philosophical tenets underpinning key theoretical frameworks and demonstrates how these tenets inform particular kinds of research practice in mathematics education research. We believe that a deep understanding of significant theories from the humanities and social sciences is crucial for doing high quality research in education. For that reason this book focuses on six key theoretical sources unpacking their relevance and application to specific research examples. We situate these key theorists within a larger framework pertaining to the history of thought more generally and discuss how competing theories of teaching and learning differ in terms of their philosophical assumptions. In so doing we offer context and motivation for particular research methods with the agenda of helping researchers reflect on why particular approaches and not others might work for them.
