Epilepsy Surgery: A Practical Case-Based Approach Aline Herlopian, Dennis Dee Spencer, Lawrence J. Hirsch, David King-Stephens, 2024-04-08 This collection of epilepsy surgical cases illustrates patients with straightforward and challenging pharmacoresistant epilepsy. These cases convey the advancements, investigative strategies, past and modern surgical tools, and sophisticated state of the art of epilepsy surgery and its disciplines. This textbook is organized into four major sections that parallel the contemporary FDA approved and clinically applicable approaches: resective surgery, disconnection procedures, laser therapy, and neuromodulation. The chapters provide a case-based, interactive, and multidisciplinary integrative approach to pre-operative evaluation, data analysis, and surgical decision making. In addition, we present alternative approaches to certain diagnostic tools, decision making strategies, and surgical interventions. This textbook will provide trainees and clinicians with an exhaustive understanding of epilepsy surgery. Moreover, it will be an invaluable resource for preparation for the epilepsy board examination.
