The Dhaka University Journal of Science ,2009 **Aromatic and Medicinal Plants** Hany El-Shemy,2017-03-15

This book covers interesting research topics and the use of natural resources for medical treatments in some severe diseases. The most important message is to have native foods which contain high amount of active compounds that can be used as a medicinal plant. Most pharmaceutical drugs were discovered from plants and still ongoing research will have to predict such new active compounds as anti diseases. I do believe this book will add significant knowledge to medical societies as well as can be used for postgraduate students.

Dr. Khusbhu Verma & Preeti Singh ,2020-07-06 Honey is a sugary food substance having high sugar concentration reduced water activity hydrogen peroxide and low pH 3.4 acidic. There are various types of honey which are classified on different basis such as based on origin based on the floral source etc. It is a supersaturated sugar solution predominantly glucose and fructose. Its colour varies from colourless to dark brown. It is a natural antimicrobial substance that kills microbes by acidity osmolarity and enzymatic production of hydrogen peroxide. In ancient time it was valued for its medicinal properties. Now days it is still used as preservative and make a different kind of dishes also alcoholic drinks. It has a greater sweetening ability that sugar does not have. The antimicrobial activity of honey has known since 19th century with a big history. Recently many studies on honey has done for its antimicrobial properties. The antimicrobial and antioxidant strength depends on the darkness of the honey. Raw honey at different concentration used as natural preservative in food products to increase their self life because raw honey has more minerals vitamins and antifungal and antibacterial properties and it prevents from many diseases. Manuka honey derived from New Zealand used for medicinal purpose in recent time but also can be used as natural preservative instead of using artificial preservative.

New Technical Books New York Public Library,1992 Industrial Chocolate Manufacture and Use Steve T. Beckett,2011-09-07 Since the third edition of this standard work in 1999 there has been a significant increase in the amount of chocolate manufactured worldwide. The fourth edition of *Industrial Chocolate Manufacture and Use* provides up to date coverage of all major aspects of chocolate manufacture and use from the growing of cocoa beans to the packaging and marketing of the end product. Retaining the important and well received key features of the previous edition the fourth edition also contains completely new chapters covering chocolate crumb cold forming technologies intellectual property and nutrition. Furthermore taking account of significant changes and trends within the chocolate industry much new information is incorporated particularly within such chapters as those covering the chemistry of flavour development chocolate flow properties chocolate packaging and chocolate marketing. This fully revised and expanded new edition is an essential purchase for all those involved in the manufacture and use of chocolate.
