AI in the Math Classroom, Grades PreK-2 Dr. Nicki Newton, 2025-12-31 AI prompts and strategies to help you save time and focus on teaching math. Are you tired of spending countless hours on lesson planning, searching for differentiated materials and drafting communications to families? This book is the practical time saving guide you've been waiting for. In her signature playful and witty voice, Dr. Nicki Newton demystifies artificial intelligence for grades PreK-2 teachers, showing you how to streamline your workflow without losing the heart of your teaching. Discover how to leverage AI to handle time-consuming tasks, allowing you to focus on what truly matters: building relationships with your students and fostering a love for math. This is the first book of its kind to focus on using AI to support sound pedagogy in early math classrooms. Inside this teacher friendly playbook, you will find a process for crafting fruitful AI prompts to quickly generate the exact thing you need for class the next day. Actionable strategies and models for using AI to create tiered activities and culturally relevant word problems for all learners. Clear guidance on the ethical and responsible use of AI, including how to navigate algorithmic bias and privacy concerns. Interactive activities and reflective questions to help you practice every bit of what you're learning right away across AI platforms for any early math content. This book will empower you to work smarter, not harder. You'll learn how to use AI as your personal assistant, creating more engaging, personalized, and equitable learning experiences that will benefit every student in your classroom.

Exploring Math with Technology Allison W. McCulloch, Jennifer N. Lovett, 2023-08-01 This timely book provides support for secondary mathematics teachers learning how to enact high quality, equitable math instruction with dynamic mathematics specific technologies. Using practical advice from their own work as well as from interviews with 23 exceptional technology using math teachers, the authors develop a vision of teaching with technology that positions all students as powerful doers of mathematics using math specific technologies e.g. dynamic graphing and geometry applications, data exploration tools, computer algebra systems, virtual manipulatives. Each chapter includes sample tasks, advice from technology using math teachers, and guiding questions to help teachers with implementation. The book offers a rich space for secondary math teachers to explore important pedagogical practices related to teaching with technology combined with broader discussions of changing the narratives about students, emphasizing the mathematics they can do and the mathematics they deserve. Accompanying online support materials include video vignettes of teachers and students interacting around technology enhanced tasks in the classroom as well as examples of more than 30 high quality technology enhanced tasks.
