## **Pediatric Nursing Case Studies:**

*Pediatric Primary Care Case Studies* Catherine E. Burns, Beth Richardson, Margaret Brady, 2010-10-25 Pediatric Primary Care Case Studies is a collection of pediatric case studies of common health problems of well acutely ill and chronically ill children. This text provides students with the opportunity to assess the scenario differential diagnoses treatment and educational plans. The cases include history and physical examination data and provide suggested case solutions. The cases include developmental behavioral and disease problems written to include family cultural and other contextual issues which must be considered to provide optimal care. Current guidelines and evidence based research are used to support the care recommendations. Pediatric Primary Care Case Studies provides realistic ambulatory care cases that allows students to develop their critical thinking skills as they work through common situations faced by health care providers 2010 546 pages

*Case Studies in Maternity and Pediatric Nursing* Diann S. Gregory, Bonita E. Broyles, 2009 Created especially for nurses the Clinical Decision Making series helps to bridge the gap between content knowledge and clinical application. Case Studies in Maternity and Pediatric Nursing provides 80 nursing case histories that include critical thinking questions and answers based on real life client situations. Every case contains a blueprint of variables that must be considered while evaluating a particular scenario and are pertinent concerning the client nursing protocol and setting of care. Examples of these variables include age, gender, cultural influences, pre-existing conditions, legal issues, or communication skills. Each blueprint and case is different just as each clinical situation is unique. By simulating the decision making process, learners gain the confidence needed to make informed clinical judgments that will make them successful practitioners. Simply stated, Clinical Decision Making shortens the distance between theory and practice like no other educational tool
