*Utilizing Artificial Intelligence for Automated Greenhouse Gas Monitoring in Sustainable Agriculture* Ruth Nyads,2025-02-10

Scientific Study from the year 2024 in the subject Environmental Sciences Sustainability grade A language English abstract This research focused on the application of AI to support automatic tracking of GHG emissions in the agricultural sector one of the major contributors to emissions The proposed system for GHG tracking was designed with IoT sensors satellites and record keeping making it scalable and efficient compared to previous methods Some of the findings reveal that AI models are highly accurate in estimating emissions through models such as Gradient Boosting Machines hence cutting down the cost of manual exercise by an average of 29.7% Our analysis yields strong positive relationships between emissions and environmental conditions especially soil moisture content Nevertheless such issues as data protection and integration which are regarded as the major concerns in AI development this research proves that AI in sustainable agriculture can be effective and beneficial in combating climate change and meeting environmental requirements

**Harnessing Artificial Intelligence for Climate Resilience in American Agriculture** Ruth Nyads,2025-02-10

Scientific Study from the year 2024 in the subject Environmental Sciences Sustainability grade A language English abstract

This study explores the integration of artificial intelligence AI in American agriculture to enhance climate resilience focusing on three critical areas Precision farming crop yield prediction resource optimization and control of pests The study adopts machine learning techniques IoT real time monitoring and satellite data to compare the performance of AI interventions in addressing climate change risks This paper establishes that AI leads to an increase in crop yields by 28.6% a decrease in water use by 40% and a decrease in pesticide use by 30% proving the capacity of AI in productivity and sustainability These findings are statistically significant as revealed by correlational coefficients showing the extent of associations between AI applications and agriculture This study's contributions to knowledge and practice for policymakers agribusinesses and researchers are valuable despite the barriers including high implementation costs and poor rural infrastructure If these barriers are well addressed then AI offers a perfect solution to developing a robust agriculture sector that can cope with climate volatility
