**Electric Charging Intended Functionality, Availability, and Equity Inclusion** Brian J. Kozumplik,2023-01-19 As unprecedeted growth in EV sales is expected and the number of public charging stations must be planned accordingly as charger up time and functionality i e availability is the number one factor for users once the charging system is installed Electric Vehicle Intended Functionality Availability and Equity Inclusion informs current customers and potential purchasers of functionality availability and equity inclusion issues with EV charging systems currently in production and in use across North America and Europe Note that if shortages of available chargers are recognized and exposed across the US this could then have a negative impact on future potential EV customers from making the leap from traditional ICE vehicles to EVs Click here to access the full SAE EDGETM Research Report portfolio <https://doi.org/10.4271/EPR2023001>

*Electric Vehicle Recharge Time, Reliability, and Interoperability* Brian J. Kozumplik,2022-12-15 As more consumers and operators adopt electric vehicles EVs as personal and fleet vehicles questions regarding recharge time reliability and interoperability of EV supply equipment and charging systems currently in use across North America and Europe remain The current lack of understanding has led to consumer anxiety and in some cases inadvertent abuse and mishandling of electric supply equipment Electric Vehicle Recharge Time Reliability and Interoperability navigates issues such as charging equipment reliability the complexity Interoperability concerning charging networks EVs and payment systems various public and private charging network issues and lagging regulations and standards While many challenges need to be addressed this report also identifies the improvements made since early adoption of EV charging technology as well as ongoing efforts to improve it further Click here to access the full SAE EDGETM Research Report portfolio <https://doi.org/10.4271/EPR2022028>
