Benedek,Gary H. Wynn,2016 The number of individuals diagnosed with posttraumatic stress disorder has

increased in the past decade not only in the military and veteran population but within the civilian population as well. Traditional treatments such as pharmacotherapy and psychotherapy have provided less than ideal results proving to be less effective when used alone to treat the disorder. In *Complementary and Alternative Medicine for PTSD*, COL David Benedek and LTC Gary Wynn offer insight into the future of complementary and alternative medicine, shining a light onto how these techniques fit into clinical practice to create the most beneficial treatments for the patient. This book is both an essential resource and practical guide to everyday clinical interactions. It is a necessary addition to the medical library for students and senior clinicians alike.

Groundwater Recharge in a Desert Environment James F. Hogan, Fred M. Phillips, Bridget R. Scanlon, 2004-01-09. Published by the American Geophysical Union as part of the Water Science and Application Series, Volume 9. Groundwater recharge, the flux of water across the water table, is arguably the most difficult component of the hydrologic cycle to measure. In arid and semiarid regions, the problem is exacerbated by extremely small recharge fluxes that are highly variable in space and time. From the Preface: *Groundwater Recharge in a Desert Environment*. The Southwestern United States speaks to these issues by presenting new interpretations and research after more than two decades of discipline-wide study. Discussions on developing environmental tracers to fingerprint sources and amounts of groundwater at the basin scale, the critical role of vegetation in hydroecological processes, new geophysical methods in quantifying channel recharge, applying Geographical Information System (GIS) models to land surface processes, coupling process-based vadose zone to groundwater modeling, and more, make this book a significant resource for hydrologists, biogeoscientists, and geochemists concerned with water and water-related issues in arid and semiarid regions.
