**Climate Change as Class War** Matthew T. Huber,2022-05-10 How to build a movement to confront climate change The climate crisis is not primarily a problem of

believing science or individual carbon footprints it is a class problem rooted in who owns controls and profits from material

production As such it will take a class struggle to solve In this ground breaking class analysis Matthew T Huber argues that

the carbon intensive capitalist class must be confronted for producing climate change Yet the narrow and unpopular roots of

climate politics in the professional class is not capable of building a movement up to this challenge For an alternative

strategy he proposes climate politics that appeals to the vast majority of society the working class Huber evaluates the Green

New Deal as a first attempt to channel working class material and ecological interests and advocates building union power in

the very energy system we need to dramatically transform In the end as in classical socialist movements of the early 20th

Century winning the climate struggle will need to be internationalist based on a form of planetary working class solidarity
