Paper Or Plastic Energy Environment And Consumerism In Sweden And America

**Eberhard Jochem, Jayant A.
Sathaye, Daniel Bouille**

Paper Or Plastic Energy Environment And Consumerism In Sweden And America:

Paper or Plastic? Rita J. Erickson, 1997-07-30 This study compares household energy use environmental awareness and consumerism among residents of small towns in Sweden and America. The author a cultural anthropologist uses quantitative and qualitative data from fieldwork to formulate a holistic analysis. The study considers broader questions about the uses of energy consumer goods quality of life and the environment. The industrial worldview is critiqued at both individual and institutional levels. It concludes with a call for a more spiritual approach to environmentalism and social issues.

Ethical Consumption James G. Carrier, Peter G. Luetchford, 2012-03-01 Increasingly consumers in North America and Europe see their purchasing as a way to express to the commercial world their concerns about trade justice the environment and similar issues. This ethical consumption has attracted growing attention in the press and among academics. Extending beyond the growing body of scholarly work on the topic in several ways this volume focuses primarily on consumers rather than producers and commodity chains. It presents cases from a variety of European countries and is concerned with a wide range of objects and types of ethical consumption not simply the usual tropical foodstuffs trade justice and the system of fair trade. Contributors situate ethical consumption within different contexts from common Western assumptions about economy and society to the operation of ethical consumption commerce to the ways that people's ethical consumption can affect and be affected by their social situation. By locating consumers and their practices in the social and economic contexts in which they exist and that their ethical consumption affects this volume presents a compelling interrogation of the rhetoric and assumptions of ethical consumption.

Social Change and the Coming of Post-consumer Society Maurie J Cohen, Halina Szejnwald Brown, Philip J Vergragt, 2017-03-31 Consumer society is an unquestionably complex social construct. However after decades of unremitting dominance there are signs emerging that it is starting to falter both as a coherent and durable system of social organization and as a strategy for societal advancement. Debates concerning how we can transition beyond present energy and materials intensive consumer society are beginning to gain greater salience. *Social Change and the Coming of Post Consumer Society* aims to develop more complete appreciation of the relevant processes of social change and to identify effective interventions that could enable a transition to supersede consumer society. Bringing together leading interdisciplinary experts on social change the book identifies and analyzes several ongoing small and modest scale social experiments. Possibilities for macro scale change from the interlinked perspectives of culture economics finance and governance are then explored. These contributions expose the systemic problems that are emblematic of the current condition of consumer society specifically the unsustainability of prevailing consumption practices and lifestyles and the persistence of inequalities. These observations are summarized and extended in the final chapter of the book. This volume will be of great interest to students and scholars of sustainable consumption sustainability transitions environmental sociology and sustainable development.

Society, Behaviour, and Climate Change Mitigation Eberhard Jochem, Jayant A.

Sathaye,Daniel Bouille,2006-01-05 The Intergovernmental Panel on Climate change IPCC was jointly established by the World Meteorological Organization WMO and the United Nations Environment Programme UNEP to assess the scientific technical and socio economic information relevant for the understanding of the risk of human induced climate change Since its inception the IPCC has produced a series of comprehensive assessment Reports Special Reports and Technical Papers on the state of the understanding of causes of climate change its potential impacts and options for response strategies In 1998 Working Group III WG III of the ongoing Third Assessment was charged by the IPCC Plenary to assess the scientific technical environmental economic and social aspects of the mitigation of climate change and a series of cross cutting issues such as equity development and sustainability Its mandate was changed from a predominantly disciplinary assessment of the economic and social dimensions of climate change in the Second Assessment Report to an interdisciplinary assessment of the options to control the emissions of greenhouse gases and or enhance their sinks One key issue of the IPCC Third Assessment Report TAR on mitigation of climate change which has undergone an extensive review by scientists and governments is the role of present and future behaviour of individuals households private and public companies public authorities and other stakeholders

A Research Agenda for Sustainable Consumption Governance Oksana Mont, pp1 margin 0 0px 0 0px 0 0px 0 0px font 10 0px Arial Evaluating achievements challenges and future avenues for research this book explores how new dimensions of knowledge and practice contest reshape and advance traditional understandings of sustainable consumption governance

The Swedish-American Historical Quarterly ,2003 The Journal of Energy and

Development ,1997 **Cultural Analysis and the Navigation of Complexity** Lisa Kaye Brandt,2007 The complexities involved in social dilemmas and ecological troubles today challenge scientists to conduct analyses of cultural phenomena that push the boundaries of disciplines and blur the line between theory and practice Problems are not so much to be solved as they are to be explained predicted and navigated Luther P Gerlach Ph D Professor Emeritus of Anthropology at the University of Minnesota has exercised immense influence on social science policy and practice to accomplish these challenges Professor Gerlach is highly regarded within and beyond anthropology for two areas of outstanding research groundbreaking work on social movements and pioneering studies of local global environmental conflict i e the conflict between local social political and economic control versus global ecological and economic interdependence This volume s Preface traces Professor Gerlach s intellectual biography and the peer reviewed chapters indicate the far reaching impact he and his research continue to have on academic and applied science Topics cover theories and methods as well as timely case studies in Global climate policy Language and social movements Environmental and ecosystem management Public debate environmental justice and risk construction Complexity theory and organizations Cultural expression and archaic hunting methods Energy use Political economy and witch killings Public health Ethnologia Scandinavica ,1999 Vol for 1971 contains papers presented at the 1st International Symposium for Ethnological Food Research in Lund 1970 **Handbook of Environmental Sociology**

Riley E. Dunlap, William Michelson, 2002 Environmental sociology an introduction Sociological theory and the natural environmental Theory and the sociological study of the built environment Socio behavioral qualities of the built environment Macro environments and people cities suburbs and metropolitan areas Designing the built environment Rural environments and agriculture Energy society and environment Natural hazards and disasters Technological hazards and disasters Risk technology and society Human dimensions of global environmental change Social impact assessment and technology assessment The environmental movement in the United States Environmental concern conceptual and measurement issues Environmental sociology in nonacademic settings *Rethinking Science, Technology, and Social Change* Ralph Schroeder, 2007 Rethinking Science Technology and Social Change challenges the prevailing notion that science and technology are constructed or socially shaped The text puts forth a case for technological determinism based on a realistic and pragmatic account of science and technology informed by historical comparisons Schroeder begins by exploring the social organization of scientific and technological advances the intersecting trajectories of big science and technological systems and the impact of science and technology on economic change He goes on to discuss the social implications of technology including the way that it affects politics and consumption The book then rethinks traditional theories about the relationship between science technology and social change The argument presented shifts the debate on topics such as the relationship between growth and sustainability and thus has important policy implications This book will be of great interest to scholars scientists and anyone interested in understanding how science and technology are transforming our world

The Effect of Changes in Technology of Derived Demand Michael Scott Alexander, 1997 **Bibliographic Index**, 1997 **Thermostats with Attitudes** Monica Nevius, 2001 *Global Tourism* Sarah M. Lyon, E. Christian Wells, 2012-03-15 Global tourism is perhaps the largest scale movement of goods services and people in history Consequently it is a significant catalyst for economic development and sociopolitical change While tourism increasingly accounts for ever greater segments of national economies the consequences of this growth for intercultural interaction are diverse and uncertain The proliferation of tourists also challenges classic theoretical descriptions of just what an economy is What are the commodities being consumed What is the division of labor between producers and clients in creating the value of tourist exchanges How do culture power and history shape these interactions What are the prospects for sustainable tourism How is cultural heritage being shaped by tourists around the world These critical questions inspired this volume in which the contributors explore the connections among economy sustainability heritage and identity that tourism and related processes makes explicit The volume moves beyond the limits of place specific discussions case studies and best practice examples Accordingly it is organized according to three overarching themes exploring dimensions of cultural heritage the multi faceted impacts of tourism on both hosts and guests and the nature of touristic encounters Based on ethnographic and archaeological research conducted in distinct locations the contributors conclusions and theoretical arguments reach far beyond the limits

of isolated case studies Together they contribute to a new synthesis for the anthropology of tourism while simultaneously demonstrating how emerging theories of the economics of tourism can lead to the rethinking of traditionally non touristic enterprises from farming to medical occupations **Index de Périodiques Canadiens** ,1998 Implementing California's Loading Order for Electricity Resources ,2005 Current Geographical Publications University of Wisconsin--Milwaukee. Library,1998 Current Geographical Publications CGP is a non profit service to the scholarly community initiated in 1938 by the American Geographical Society of New York Beginning in 2006 the format changed to include the tables of contents of current geographical journals The journal titles listed link to web pages or PDF scans of the current issue's contents
