and how to heal its painful aftereffects

Gaither's Dictionary of Scientific Quotations Carl C. Gaither, Alma E. Cavazos-Gaither, 2008-01-08 Scientists and other keen observers of the natural world sometimes make or write a statement pertaining to scientific activity that is destined to live on beyond the brief period of time for which it was intended. This book serves as a collection of these statements from great philosophers and thought influencers of science past and present. It allows the reader quickly to find relevant quotations or citations. Organized thematically and indexed alphabetically by author, this work makes readily available an unprecedented collection of approximately 18 000 quotations related to a broad range of scientific topics

Shipping Innovation N. Wijnolst, Tor Wergeland, Kai Levander, 2009 There were not many textbooks on shipping available for the students in the early 1990s. Therefore it was decided to write Shipping in 1996. One year earlier Niko Wijnolst had published Design Innovation in Shipping based on work at the Delft University of Technology. The two books together offered a comprehensive insight and overview into the dynamics of global shipping and maritime innovation. Although the core of the books held its value, it was decided to make an update of the two books and merge them into one new textbook. Shipping Innovation, destined for a broad spectre of maritime students and professionals. Some substantial new parts were added as well as some new contributions by other writers. This textbook offers a one stop shopping experience to those students and professionals who wish to get acquainted with the multifaceted aspects of global shipping and its everlasting innovation dynamics. Some of the new contributions are the mission based design process of a Panamax containership and a ro-ro vessel, sustainable shipping and innovation, and an innovation case study on the revolutionary design of a ballast free ship. Shipping Innovation is a remarkable book. It deserves to become a standard text for students and professionals alike, combining as it does both commercial and technical topics into one coherent whole.
