**MotorBoating** ,2007-05      Demonstration of Remote Monitoring Technology for Cathodic Protection Systems: Phase II ,1997 The Army owns and maintains more than 3000 miles of buried natural gas pipeline 20 000 underground storage tanks USTs and more than 300 elevated water storage tanks Cathodic protection CP is required by regulation on many of these structures to prevent corrosion Periodic testing is required to ensure proper CP system operation but many Directorates of Public Works DPWs do not have sufficient resources to conduct such tests regularly Many malfunctions remain undetected until the structure corrodes and leaks Several companies have begun manufacturing remote monitoring units RMUs for CP systems This technology allows personnel to monitor multiple CP systems from a central location so problems can be detected and repaired immediately An 8 month field evaluation of CP RMUs was performed to determine the effectiveness of systems from three manufacturers Demonstration systems were selected on the basis of cost features availability etc Rmu readings were compared with manual method readings throughout a variety of conditions Units from only one manufacturer performed successfully New systems have entered the market since this demonstration began      VIII International Scientific and Theoretical Conference «Technologies and strategies for the implementation of scientific achievements» ,2025-09-05 Papers of participants of the VIII International Multidisciplinary Scientific and Theoretical Conference Technologies and strategies for the implementation of scientific achievements held on September 5 2025 in Stockholm are presented in the collection of scientific papers      **Analysis, Design and Evaluation of Man - Machine Systems** G. Johannsen,J. E. Rijnsdorp,2014-05-16 Analysis Design computer aided control station with coloured display for production control dynamic and static models for nuclear reactor operators ironies of automation and theory and validation of model of the human observer and decision maker The operation simulation for the evaluation and improvement of a medical information system are fully covered An in depth account of an online information retrieval through natural language is provided The control of input variables by head movements of handicapped persons is completely presented A chapter is devoted to a graphical hardware description language for logic simulation programs Another section focuses on the symbiotic knowledge based computer support systems The book can provide useful information to computer programmers engineers students and researchers      **Alarm Management for Process Control** Douglas H. Rothenberg,2018-06-15 Alarm Management for Process Control elevates alarm management from a fragmented collection of procedures metrics experiences and trial and error to the level of a technology discipline It provides a complete treatment of best practices in alarm management The technology and approaches found here provide the opportunity to completely understand the what the why and the how of successful alarm systems No modern industrial enterprise particularly in such areas as chemical processing can operate without a secure and reliable infrastructure of alarms and controls they are an integral part of all production management and control systems Improving alarm management is an effective way to provide operators with

high value support and guidance to successfully manage industrial plant operations Readers will find Recommendations and guidelines are developed from fundamental concepts to provide powerful technical tools and workable approaches Alarms are treated as indicators of abnormal situations not simply sensor readings that might be out of position Alarm improvement is intimately linked to infrastructure management including the vital role of plant maintenance to alarm management the need to manage operators charter to continue to operate during abnormal situations vs cease operation And the importance of situation awareness without undue reliance upon alarms The ability to appreciate technical issues is important but this book requires no previous specific technical educational or experiential background The style and content are very accessible to a broad industrial audience from board operator to plant manager All critical tasks are explained with workflow processes examples and insight into what it all means Alternatives are offered everywhere to enable users to tailor make solutions to their particular sites
