Paradox Equilibrium 4 Paradox Series:

Lectures on Microeconomics Romans Panco, 2024-08-20 Economic concepts and techniques presented through a series of big questions models that show how to pose a questions rigorously and work toward an answer This book helps readers master economic concepts and techniques by tackling fundamental economic and political questions through a series of models It is organized around a sequence of big questions among them When do markets help translate individuals uncoordinated selfish actions into outcomes that are best for all Do markets change people and if so for worse or better Translated into the language of modern economics do Marx s ideas have merit Why is there so much income inequality Or is there too little The arguments are in the theorem proof format distinguishing results derived in the context of fully specified models from educated speculation Readers will learn how to pose a question rigorously and how to work toward an answer and to appreciate that even especially the broadest and most ambitious questions call for a model The goal of the book is not to indoctrinate but to show readers how to reason toward their own conclusions The first chapter on the Walrasian model of general equilibrium serves as the prerequisite for the rest of the book The remaining chapters cover less conventional topics including the morality of markets matching theory Marxism socialism and the resilience of markets a formalization of Kant s categorical imperative unintended consequences of policy design and theories of justice The book can be used as a textbook for advanced undergraduate or graduate students or as a resource for researchers in disciplines that draw on normative economics

Methodological Foundations of Macroeconomics Alessandro Vercelli, 1991-09-26 This book is an investigation of the methodological and epistemological foundations of macroeconomic theory based on an examination of the theories of Keynes and Lucas It is divided into two parts In the first Professor Vercelli discusses the methodological issues which lie behind the conflict among different schools of thought in macroeconomics equilibrium and disequilibrium risk and uncertainty rationality and causality These issues are central to the current debate not only in many branches of economics but also in other scientific disciplines

The traditional point of view of science based on equilibrium stability and determinism has been increasingly challenged by a new point of view in which disequilibrium instability and uncertainty play a crucial role This the author argues is bound to put macroeconomics in a new more promising position In the second part of the book the author compares the two main alternative research programmes in macroeconomics that outlined by Keynes in his General Theory and that suggested by Lucas the leader of the new classical economists **Web and Internet Economics** Yiling Chen,Nicole

Immorlica,2013-12-09 This book constitutes the thoroughly refereed conference proceedings of the 9th International Conference on Web and Internet Economics WINE 2013 held in Cambridge MA USA in December 2013 The 36 revised full papers were carefully reviewed and selected from 150 submissions and cover research in theoretical computer science artificial intelligence and microeconomics **AIChE Symposium Series** American Institute of Chemical Engineers,1972
