

**Graduation Speech – Class of 2015  
Saint Xavier High School - May 17, 2015**

**Graduates:**

**Welcome to this Day and to the meaning behind the dignity of this ceremony as you join the ranks of Saint Xavier's alumni.**

**You have been school leaders at an historical time as we concluded the celebration of the school's 150<sup>th</sup> Anniversary. Reflect for a moment on that history, on those who have gone before you, developing the philosophy, programs and facilities and paving the way for the opportunities you have had and the experiences we have shared. Soon it will be your responsibility to ensure a St. X experience for other students and that such opportunities are there and even better for them.**

**Then reflect one more time on our theme for the year:**

***Together, we dream, we believe and we achieve.*** Those who walked the halls, took the classes and were part of the teams and activities before you continued to dream, developing a vision for what St. X has become and achieving in ways that propelled our school forward. And all along the way, they believed faithfully that God would walk with them and provide even more opportunities to learn, know, love and serve.

**You have continued the traditions, stretched the vision and walked together in faith in all that we have asked you to do.**

## Parents Graduation Speech To Child:

**International Handbook of Migration, Minorities and Education** Zvi Bekerman, Thomas Geisen, 2011-10-06

Migrants and minorities are always at risk of being caught in essentialized cultural definitions and being denied the right to express their cultural preferences because they are perceived as threats to social cohesion. Migrants and minorities respond to these difficulties in multiple ways as active agents in the pedagogical, political, social, and scientific processes that position them in this or that cultural sphere. On the one hand, they reject ascribed cultural attributes while striving towards integration in a variety of social spheres e.g. school and workplace in order to achieve social mobility. On the other hand, they articulate demands for cultural self-determination. This discursive duality is met with suspicion by the majority culture. For societies with high levels of migration or with substantial minority cultures, questions related to the meaning of cultural heterogeneity and the social and cultural limits of learning and communication e.g. migration education or critical multiculturalism are very important. It is precisely here where the chances for new beginnings and new trials become of great importance for educational theorizing, which urgently needs to find answers to current questions about individual freedom, community, cultural affiliations and social and democratic cohesion. Answers to these questions must account for both political and learning perspectives at the macro, mezzo, and micro contextual levels. The contributions of this edited volume enhance the knowledge in the field of migrant minority education with a special emphasis on the meaning of culture and social learning for educational processes.

**Junior Graphic** Mavis Kitcher (Mrs), 2005-08-17 *Encyclopedia of Diversity in Education* James A. Banks, 2012-05-17 The diversity education literature both nationally and internationally is broad and diffuse. Consequently, there needs to be a systematic and logical way to organize and present the state of research for students and professionals. American citizens need to understand the dynamics of their increasingly diverse communities and institutions and the global world in which we live, work, and lead. With continually evolving information on diversity policies, practices, and programs, it is important to have one place where students, scholars, teachers, and policymakers can examine and explore research, policy, and practice issues and find answers to important questions about how diversity in U.S. education is enriched with theories, research, and practices. In other nations, these are explained and communicated, and how they affect institutional change at both the K-12 and postsecondary levels. With about 700 signed entries with cross references and recommended readings, the *Encyclopedia of Diversity in Education* (4 volumes in both print and electronic formats) will present research and statistics, case studies, and best practices. Policies and programs at pre- and postsecondary levels. Diversity is a worldwide phenomenon, and while most of the entries in the *Encyclopedia* will focus on the United States, diversity issues and developments in nations around the world, including the United States, are intricately connected. Consequently, to illuminate the many aspects of diversity, this volume will contain entries from different nations in the world. In order to illuminate the myriad aspects of diversity, from A to Z, this *Encyclopedia* will cover the full spectrum of diversity.

issues including race class gender religion language exceptionality and the global dimensions of diversity as they relate to education This four volume reference work will be the definitive reference for diversity issues in education in the United States and the world Ideas of Self-discipline and Their Effect on Parent-child Relationships During the Preschool Years
