technological innovation and technology based business development in their local economies These efforts have resulted in productive new forms of partnership and cooperation at all levels While federal programs have sometimes supported these efforts and while recent changes in federal policy have improved the climate for high technology development initiatives in most cases both the initiative and the ongoing leadership have come from imaginative state and local leaders This five chapter report provides 1 an overview of high technology development HTD 2 a definition and analysis of high technology industries 3 a discussion of entrepreneurship and venture capital in HTD 4 a discussion of state and local government university and private sector initiatives for HTD and 5 an examination of the federal role in regional HTD Three reports are appended they concern 1 the theoretical base for high technology location and regional development 2 a regional assessment of the formation and growth in high technology firms and 3 a preliminary investigation of recent evidence on high technology industries spatial tendencies One factor examined in the latter report is the nature and diversity among high technology industries in both growth performance and locational tendencies JN Parks and Economic Development John L. The New Urban Park Hal Rothman, 2004 From Yellowstone to the Great Smoky Mountains America's national parks are sprawling tracts of serenity most of them carved out of public land for recreation and preservation around the turn of the last century America has changed dramatically since then and so has its conceptions of what parkland ought to be In this book one of our premier environmental historians looks at the new phenomenon of urban parks focusing on San Francisco's Golden Gate National Recreation Area as a prototype for the twenty first century Cobbled together from public and private lands in a politically charged arena the GGNRA represents a new direction for parks as it highlights the long standing tension within the National Park Service between preservation and recreation Long a center of conservation the Bay Area was well positioned for such an innovative concept Writing with insight and wit Rothman reveals the many complex challenges that local leaders politicians and the NPS faced as they attempted to administer sites in this area He tells how Representative Phillip Burton guided a comprehensive bill through Congress to establish the park and how he and others expanded the acreage of the GGNRA redefined its mission to the public forged an identity for interconnected parks and struggled against formidable odds to obtain the San Francisco Presidio and convert it into a national park Engagingly written The New Urban Park offers a balanced examination of grassroots politics and its effect on municipal state and federal policy While most national parks dominate the economies of their regions GGNRA was from the start tied to the multifaceted needs of its public and political constituents including neighborhood ethnic and labor interests as well as the usual supporters from the conservation movement As a national recreation area GGNRA helped redefine that category in the public mind By the dawn of the new century it had already become one of the premier national park areas in terms of visitation Now as public lands become increasingly scarce GGNRA may well represent the future of national parks in America Rothman shows that this model works and his book will be an invaluable resource for planning tomorrow's parks
