

The following fractions are equivalent to each other

$$\frac{1}{2} \xrightarrow{\times 4} \frac{4}{8}$$

$$\frac{1}{3} \xrightarrow{\times 2} \frac{2}{6}$$

$$\frac{1}{4} \xrightarrow{\times 3} \frac{3}{12}$$

$$\frac{1}{2} \xrightarrow{\times 3} \frac{3}{6}$$

$$\frac{1}{3} \xrightarrow{\times 5} \frac{5}{15}$$

$$\frac{1}{4} \xrightarrow{\times 10} \frac{10}{40}$$

$$\frac{1}{2} = \frac{4}{8} = \frac{3}{6}$$

$$\frac{1}{3} = \frac{2}{6} = \frac{5}{15}$$

$$\frac{1}{4} = \frac{3}{12} = \frac{10}{40}$$

Preparing 21st Century Teachers for Teach Less, Learn More (TLLM) Pedagogies Kumar, Pradeep,Keppell, Michael James,Lim, Chee Leong,2019-12-27 The current trend of learner centeredness in education has been challenging many of the current ways of working especially in higher education institutions This rapid change in educational institutions demands educators acquire new sets of skills via continuous reflective practices Hence educators in higher education institutions are actively involved in research driven teaching and learning practices This change of role from mere content delivery to learning facilitators could be better achieved through a strong research driven community of practice Preparing 21st Century Teachers for Teach Less Learn More TLLM Pedagogies is a pivotal reference source that provides vital research on the application of practice based learning techniques in higher education institutions This publication establishes a platform for academics to share their best practices to promote teach less learn more pedagogies and learn reciprocally from the community of practice While highlighting topics such as interactive learning experiential technology and logical thinking skills this book is ideally designed for teachers instructional designers higher education faculty deans researchers professionals universities academicians and students seeking current research on transformative learning and future teaching practices

Large-Scale Studies in Mathematics Education James A. Middleton,Jinfa Cai,Stephen Hwang,2015-05-05 In recent years funding agencies like the Institute of Educational Sciences and the National Science Foundation have increasingly emphasized large scale studies with experimental and quasi experimental designs looking for objective truths Educational researchers have recently begun to use large scale studies to understand what really works from developing interventions to validation studies of the intervention and then to efficacy studies and the final scale up for large implementation of an intervention Moreover modeling student learning developmentally taking into account cohort factors issues of socioeconomics local political context and the presence or absence of interventions requires the use of large data sets wherein these variables can be sampled adequately and inferences made Inroads in quantitative methods have been made in the psychometric and sociometric literatures but these methods are not yet common knowledge in the mathematics education community In fact currently there is no volume

devoted to discussion of issues related to large scale studies and to report findings from them This volume is unique as it directly discusses methodological issue in large scale studies and reports empirical data from large scale studies

Leeper,Rezaul Mahmood,Arturo Quintanar,2009 A series of land use land cover change LULCC based sensitivity experiments including changes in vegetation type fractional vegetation FV and soil moisture SM over Western Kentucky were conducted to investigate atmospheric response to land use Land use for this study was chosen in the context of Western Kentucky s historical LULCC For this study vegetation types considered were grassland forest and bare soil with further variations in FV for grassland and forest at 25 50 75 and 100% and systematic increases and decreases in volumetric SM of 0 05 0 10 and 0 15m³ m⁻³ To the author s knowledge this is the first assessment of its kind that incorporates these types of LULCC in a single study In addition typical anthropogenic land use change often incorporates several types of LULCC Moreover this assessment provides a robust analysis of the impacts LULCC has on atmospheric processes over Western Kentucky To simulate the importance of land use on atmospheric processes a well known meso scale model developed by the National Center for Atmospheric Research NCAR and the Pennsylvania State University PSU MM5 coupled with an intermediately complex land surface model LSM Noah was used The purpose of this research is to investigate the impact of multiple types of LULCC on planetary boundary layer PBL evolution PBL stability near surface 3D wind fields temperature and moisture Furthermore it is anticipated that multiple types of LULCC will provide more insight into the complex nonlinear land atmosphere interactions from atmospheric air quality and climatology perspectives Modeling analysis revealed the importance of land use on atmospheric processes Changes in all three types of LULCC land cover FV and SM altered the distribution of surface energy and moisture PBL structure 3D wind fields and PBL stability In general it was found that LULCC that enhanced diminished ET rates reduced increased sensible heat flux atmospheric temperature and PBL heights

below above control CTRL For instance the conversion of land cover from CTRL to grassland reduced 2 m temperature and PBL heights by 0.6°C and 228 m respectively compared to CTRL due to an evaporative advantage lower stomata resistance Multiple types of land use change were found to either offset or enhance overall modeled response to LULCC A reduction in FV to 25% over grassland diminished ET despite the evaporation advantage of grassland and increased 2 m temperature and PBL heights with respect to CTRL by 3°C and 504 m These results significantly altered horizontal and vertical wind fields affecting moisture advection and the development of meso scale circulations Compared to CTRL these differences were enhanced over drier soils but muted over moist soils Moreover the impact of LULCC on atmosphere evolution was not only dependent on the type of LULCC but also on the current state of other unaltered land surface features such as vegetation type FV and SM Alterations to modeled PBL development as a result of LULCC can have important impacts on a region's climatology and air quality Simulated changes in typical PBL moisture and temperature through time can affect local and regional climatology Depending on the type of LULCC these alternations in climate may lead to localized cooling In addition it was further hypothesized that changes in PBL height can affect air quality Given the capping inversion layer at the top of the PBL changes in PBL heights can significantly affect air quality with lower higher PBL heights diminishing enhancing air quality Moreover this research prescribes the importance of considering LULCC in atmospheric assessments of climatology and air quality including pollutant dispersion and trajectory modeling **The Journal of Immunology** ,2007
