Critical reflections of postgraduate researchers on a collaborative interdisciplinary research project

Ben Purvis¹[✉], Hannah Keding², Ashley Lewis³ & Phil Northall⁴

By employing a retrospective collaborative autoethnographic approach, this work aims to better understand how an interdisciplinary context shaped the authors' experiences of British academia during their PhD research. The authors bring together their individual observations and experiences to collectively interrogate and critically reflect on their position as postgraduate researchers (PGRs) on a collaborative interdisciplinary research project. These reflections are taken as a lens through which to interrogate the contemporary British university. Pre-existing tensions within the academy are characterised as 'asymmetries' along dimensions of risk, disciplinary hierarchy, and knowledge. It is argued that the authors' experience of uncertainty and precarity as junior academics stems principally from pre-existing structures within British academia, rather than the interdisciplinary environment in which they were immersed. By emphasising the role of the successfully trained doctoral candidate as an outcome itself, it is argued that indicators of success can be reframed, shifting the power asymmetry to place greater value on PGRs within the neoliberal academy. Highlighting the ambiguity of their convergent and divergent personal experiences, the authors suggest there is a need for a greater focus on the contested role of the PGR within the contemporary university system.

Enhancing Communication & Collaboration in Interdisciplinary Research Michael O'Rourke, Stephen Crowley, Sanford D. Eigenbrode, J. D. Wulforth, 2013-07-02 *Enhancing Communication Collaboration in Interdisciplinary Research* edited by Michael O'Rourke, Stephen Crowley, Sanford D. Eigenbrode and J. D. Wulforth is a volume of previously unpublished state of the art chapters on interdisciplinary communication and collaboration written by leading figures and promising junior scholars in the world of interdisciplinary research education and administration. Designed to inform both teaching and research, this innovative book covers the spectrum of interdisciplinary activity, offering a timely emphasis on collaborative interdisciplinary work. The book's four main parts focus on theoretical perspectives, case studies, communication tools, and institutional perspectives, while a final chapter ties together the various strands that emerge in the book and defines trend lines and future research questions for those conducting work on interdisciplinary communication. **Multidisciplinary Research Area in Arts, Science & Commerce (Volume-3)** Chief Editor- Biplab Auddya, Editor- Nazia Qureshi, Dr. Ratnaprava Parija, Dr. R. Senthamizh Veena, Dr. C. Salma, Milinkumar Maru, Mr. Romero D'Souza, 2025-06-25 **Project Management Approaches for Online Learning Design** Kurubacak, Gulsun, Yuzer, T. Volkan, 2013-01-31 Developments in online learning and its design are areas that continue to grow in order to enhance students' learning environments and experiences. However, in the implementation of new technologies, the importance of properly and fairly overseeing these courses is often undervalued. *Project Management Approaches for Online Learning Design* boldly focuses on this unique area of virtual learning by adopting a theoretical point of view and discussing the planning, organizing, securing, and managing of resources to bring about the successful completion of online learning goals and objectives. This reference source brings together project management-based approaches with an exclusive focus on each online learning design project. *An Assessment of the National Science Foundation's Science and Technology Centers Program* National Research Council, National Academy of Sciences, National Academy of Engineering, Institute of Medicine, Engineering and Public Policy Committee on Science, 1996-08-28 The National Science Foundation requested that the Committee on Science, Engineering and Public Policy of the NAS, the NAE, and the IOM form a panel to evaluate the accomplishments of the NSF Science and Technology Centers program not individual centers against its goals in research, education, and knowledge transfer. This report is the result of the work of the panel charged with that effort and provides recommendations for moving forward. *Enhancing the Effectiveness of Team Science* National Research Council, Division of Behavioral and Social Sciences and Education, Board on Behavioral, Cognitive, and Sensory Sciences, Committee on the Science of Team Science, 2015-07-15 The past half century has witnessed a dramatic increase in the scale and complexity of scientific research. The growing scale of science has been accompanied by a shift toward collaborative research referred to as team science. Scientific research is increasingly conducted by small teams and larger groups rather than individual investigators, but the

challenges of collaboration can slow these teams progress in achieving their scientific goals How does a team based approach work and how can universities and research institutions support teams Enhancing the Effectiveness of Team Science synthesizes and integrates the available research to provide guidance on assembling the science team leadership education and professional development for science teams and groups It also examines institutional and organizational structures and policies to support science teams and identifies areas where further research is needed to help science teams and groups achieve their scientific and translational goals This report offers major public policy recommendations for science research agencies and policymakers as well as recommendations for individual scientists disciplinary associations and research universities Enhancing the Effectiveness of Team Science will be of interest to university research administrators team science leaders science faculty and graduate and postdoctoral students **Science** John Michels (Journalist),2010
